Q. LNG export facilities require energy to convert natural gas into liquid natural gas (LNG) for transportation by tanker. Which type of energy would you prefer is used in this liquefaction process?

[illegible]

Q. Some municipalities in B.C. have adopted building-emissions standards that restrict or effectively prohibit the use of natural gas in new residential and commercial buildings. Do you support or oppose allowing builders of new homes and commercial buildings to choose electricity, natural gas, or a combination of both for space and water heating?
