State of the State 2017-18

Austerity, government spending, social care and data
For *The State of the State* 2017-18 Deloitte LLP commissioned Ipsos MORI to survey c.1000 UK adults on their attitudes to public service spending and austerity; social care services and personal data sharing. We found that...

- The public mood has changed since 2010 – less people support cuts and more people want services to be extended even if this means tax increases

- Attitudes to social care services are negative and there is a significant proportion of people who have not taken steps to prepare for their social care needs

- People are more confident and comfortable with government organisations using their personal data than companies
Austerity and government spending

• Most people say they remain little affected by the cuts, but the proportion who are feeling it continues to rise since 2015.

• There has been a notable shift in public opinion. The level of support for cutting public services to reduce the national debt has halved since 2010 and people are half as likely to be willing to accept less from public services.

• Protecting the NHS and healthcare from further cuts is the clear priority.

• People increasingly want to see investment in public services - 63% think it is important to extend services rather than reducing taxes or keeping spending at the same level, similar to 2000 but with more support for extending services than in 2009.
Austerity is being felt more and more— a third (33%) are feeling the impact of the cuts – the same proportions as in 2012

Q
As you may know, over recent years the Government has announced a number of spending cuts to help reduce the national deficit. To what extent, if at all, have you and your family been affected by the cuts so far?

August 2017: 8% A great deal, 25% A fair amount, 46% Not very much, 20% Not at all, 2% Don’t know

July 2016: 6% A great deal, 21% A fair amount, 47% Not very much, 25% Not at all, 1% Don’t know

August 2015: 8% A great deal, 15% A fair amount, 39% Not very much, 37% Not at all, 2% Don’t know

November 2012: 8% A great deal, 25% A fair amount, 49% Not very much, 10% Not at all, 8% Don’t know

Base: 1071 UK adults 15+
And the level of support for cutting public service spending has halved since 2010 - only a fifth (22%) now think there is a real need to do this.

**Q**

*There is a real need to cut spending on public services in order to pay off the very high national debt we now have…*

Base: Half sample 536 UK adults 15+

Survey on behalf of Deloitte LLP for *The State of the State 2017-18*
The public overwhelmingly want to prioritise protecting the NHS and healthcare from further cuts – education and police also important

Which two or three, if any, of the following main areas of public spending do you think should be protected from any cuts?

- The NHS and healthcare: 80%
- Education and schools: 49%
- The Police: 32%
- Social care for older people: 27%
- Social services for children and vulnerable adults: 23%
- Fire services: 13%
- Housing: 12%
- Defence, security and terrorism: 10%
- Transport, such as roads and rail: 8%
- Benefit payments: 7%
- Border and immigration control: 6%
- Local authority services, such as waste collection and parks: 6%
- Intelligence services: 4%
- None of these: 1%

Base: 1071 UK adults 15+

Survey on behalf of Deloitte LLP for The State of the State 2017-18
And these seem to be a consistent priority – in 2009, NHS and education were areas seen as most important to protect...

Which two or three, if any, of the following main areas of public spending do you think should be protected from any cuts?

- The NHS and healthcare: 82%
- Schools: 58%
- Care for the elderly: 46%
- The Police: 35%
- Social services: 15%
- Defence: 13%
- Benefit payments: 8%
- Local authority services: 6%
- Overseas aid: 5%
- Don’t know: 1%

Base: All who think some services should be protected (773) GB adults 19-21 June 2009
Protecting certain areas from further cuts are more important for different groups....

SOCIAL CARE

- People do not generally have faith in the social care system - only a fifth think government has the right social care policies and two thirds lack confidence social care services will be available when they need them.

- There is also widespread lack of awareness about how and who provides social care services – the majority think the NHS provides social care services and just under half (47%) wrongly think social care is free at the point of need.

- Meanwhile, only a third of people (35%) are preparing financially to a some or great extent for their social care needs in the future, yet 55% people think it is their own responsibility to do so.
People do not have faith in the current social care system – only one in five (20%) think the Government has the right policies about social care for older people...

To what extent do you agree or disagree with the following statements...

The Government has the right policies about social care for older people in the UK

- Strongly agree: 22%

Lack of awareness and understanding of social care provision—just under half wrongly think social care services are free at the point of need

I am now going to read out a couple of statements. For each one, please can you tell me whether you think it is true or false...

* Social care services are defined as the provision of services to support people to be independent, play a full part in society and protect them in vulnerable situations. It includes practical help in the home, day centres, residential and nursing care homes, as well as advice and guidance.

- **The NHS provides social care services for older people**
  - True: 34%
  - False: 63%
  - Don't know: 4%

- **Social care services are free at the point of need**
  - True: 49%
  - False: 47%
  - Don't know: 4%

Base: 1071 GB adults 15+,

Survey on behalf of Deloitte LLP for *The State of the State 2017-18*
Lack of awareness reflected in lack of preparation or action. Only 44% of people have thought about preparing financially for their social care and only a third have taken steps to do so.

Many people will require social care services when they are older and it is likely that they may have to contribute towards the cost. Before today, to what extent, if at all, had you thought about preparing financially / already preparing financially to pay for social care services you might need when you are older?

<table>

**Q**

You said you are preparing financially to pay for the social care services you might need when you are older. How are you preparing?

Base: 574 UK adults preparing financially for social care services, aged 15+

Survey on behalf of Deloitte LLP for The State of the State 2017-18
PERSONAL DATA

• More people say they trust government organisations with their personal data (56%) than they do companies (31%)

• There is an age divide when it comes to trusting government with personal data – with younger people more trusting, but also a social grade and income divide – higher earners and ABC1 are more trusting than lower income and C2DE.

• Key drivers behind trusting organisations with personal data include knowing there are rules and regulations about data use and confidence that data will not be shared with other organisations or used for marketing purposes

• People are more likely to trust government organisations to use data for the good of society and not to use their data for marketing purposes than they do companies
Over half (56%) trust government organisations with their personal data, but less than a third (31%) trust companies.

How much, if at all, do you trust government organisations/companies with your personal data?

**Government organisations**
- A great deal: 30%
- A fair amount: 14%
- Not very much: 10%
- Not at all: 46%

**Companies**
- A great deal: 29%
- A fair amount: 25%
- Not very much: 2%
- Not at all: 43%

Base: 1071 GB adults 15+.

Survey on behalf of Deloitte LLP for The State of the State 2017-18.
The young and higher earners are more likely to trust both government and companies with personal data – social grade is more a factor behind trust in government.

Rules and regulations around data use is a key driver behind trust in companies and government organisations.

Q

Which two or three of the following reasons, if any, do you think are most important in explaining why you trust government organisations/companies with your personal data.

- There are strict rules and regulations about their use of personal data
- I am confident they wouldn’t use my personal data to send me marketing info
- I am confident they do not sell or share my personal data with companies or other public services without my knowledge
- They use personal data for the good of society
- I think they appreciate how important my personal data is to me
- They are good at keeping data safe and secure
- I am confident they are prepared for and would deal well with a cyber attack
- I understand how they are using my personal data
- They have my best interests at heart
- I feel I have control over my personal data

Base: GB adults 15+ who trust government organisations (587) and companies (333) with their personal data

Survey on behalf of Deloitte LLP for The State of the State 2017-18
Lack of control over their own data and concerns that organisations can’t keep data safe are key drivers of distrust in government – for companies concern over selling data to third parties also key

Q
Which two or three of the following reasons, if any, do you think are most important in explaining why you do not trust government organisations/companies with your personal data.

- I don’t feel I have control over my personal data (37%)
- They are not good at keeping data safe and secure (30%)
- They do not necessarily have my best interests at heart (28%)
- I am not confident they are prepared for and would deal well with a cyber attack (24%)
- I don’t understand how they are using my personal data (24%)
- I am not confident they do not sell or share my personal data with companies or other public services without my knowledge (18%)
- I am concerned they don’t they appreciate how important my personal data is to me (16%)
- I am not confident they wouldn’t use my personal data to send me marketing info (12%)
- They don’t use personal data for the good of society (11%)
- There are not strict rules and regulations about their use of personal data (9%)

Base: GB adults 15+ who don’t trust government organisations (479) and companies (736) with their personal data

Survey on behalf of Deloitte LLP for The State of the State 2017-18
People are also more comfortable sharing their data online with government departments to access a service (55% comfortable), but only a 23% feel comfortable sharing personal data via social media.

- Not at all comfortable: 18%
- Not applicable: 9%

Base: 1071 GB adults 15+

Survey on behalf of Deloitte LLP for The State of the State 2017-18
Strong support for the NHS using personal data to improve their services and treatments – more split on government organisations using data in other ways, but still majority support

To what extent, if at all, do you support or oppose government organisations, such as public services and government departments, using your personal data in the following ways?

- The NHS using people’s personal health data to understand more about people’s needs and improve the services and treatments it provides
  - Strongly support: 38%
  - Somewhat support: 39%
  - Neither support nor oppose: 13%
  - Somewhat oppose: 6%
  - Strongly oppose: 3%

- Government departments using your personal data to inform funding decisions about public services in your local area
  - Strongly support: 19%
  - Somewhat support: 37%
  - Neither support nor oppose: 23%
  - Somewhat oppose: 12%
  - Strongly oppose: 8%

- Government departments securely sharing people’s personal data between them to provide a more efficient service
  - Strongly support: 19%
  - Somewhat support: 37%
  - Neither support nor oppose: 20%
  - Somewhat oppose: 14%
  - Strongly oppose: 9%

- Government departments having access to your personal data to investigate national security issues
  - Strongly support: 24%
  - Somewhat support: 32%
  - Neither support nor oppose: 19%
  - Somewhat oppose: 14%
  - Strongly oppose: 10%

Base: 1071 GB adults 15+

Survey on behalf of Deloitte LLP for The State of the State 2017-18
But we’ve seen in previous research that people tend to be more comfortable when presented with specific scenarios/use of data – but still underlying concerns – though these can be lessened by talking about safeguards.

### Q

Overall, which of the following statements is closest to your view?

<table>
<thead>
<tr>
<th>We should share all the data we can because it benefits the services and me, as long as...</th>
<th>We should not share the data as the risks to people’s privacy and security outweighs the benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>No mention of safeguards</td>
<td>33%</td>
</tr>
<tr>
<td>... data is anonymised and I can’t be identified</td>
<td>55%</td>
</tr>
<tr>
<td>... I can opt-out if I choose</td>
<td>52%</td>
</tr>
<tr>
<td>... there are heavy fines and possible prison sentences for anyone caught misusing the data</td>
<td>49%</td>
</tr>
<tr>
<td>... there are strict control on who can access the data and how it is used</td>
<td>48%</td>
</tr>
</tbody>
</table>

Base: Four split samples of c.505 GB adults aged 16-75, except ‘no mention of safeguards’, which had a base of 1,000 GB adults, July 2014.
In conclusion…

- There has been a shift in public opinion away from keeping tightening belts and towards spending more on public services – even if that means higher taxes.

- People feel they have been impacted by austerity more than they did in 2015 or 2016 and the number of people who are personally willing to accept less from public services has halved since then.

- However, there is no change in opinion on which areas should be most protected from cuts – NHS and healthcare and education are still top priority for the public.

- People do not have faith in the current social care system and two thirds (65%) lack confidence that social care services will be there when they need them.

- There is also widespread misunderstanding and lack of awareness about who provides social care services and whether it is free at the point of need – particularly from those who are less informed.

- This lack of awareness is reflected in lack of preparation or action – only a third of people have taken steps to financially prepare for their social care needs.

- Generally people are more trusting of government organisations with their personal data than they are of companies. The young and those with higher incomes are more likely to trust organisations (both government and companies) with data.

- Having regulations around data use is one of the most important drivers of trust in both companies and government organisations. The public tend to think government organisations are more likely to use personal data for the good of society and are more confident their data would not be used for marketing purposes.
Technical note

• Fieldwork was conducted between 18 to 28 August 2017.

• In total, 1071 interviews were conducted using Capibus – Ipsos MORI’s face-to-face Omnibus. All questions include all respondents unless stated otherwise (all adults aged 15+ in the United Kingdom).

• The results have been weighted to reflect the known profile of the adult population of the United Kingdom.

• Trend data are from a number of different surveys. As some these surveys were conducted online or via telephone the trends are indicative only.

• Where responses do not sum to 100, this is due to computer rounding or multicode questions.
