Introduction and objectives

Awareness and knowledge of PHE, its role and activities

Levels of public confidence and trust in PHE

Public health concerns

Health interventions

Sources of information

Face-to-face survey using Ipsos MORI Omnibus (repeat of 2016, 2015 and 2014)

Fieldwork 1st – 7th September 2017

1,709 participants – based in England, aged 15 and over

Data weighted to reflect population profile

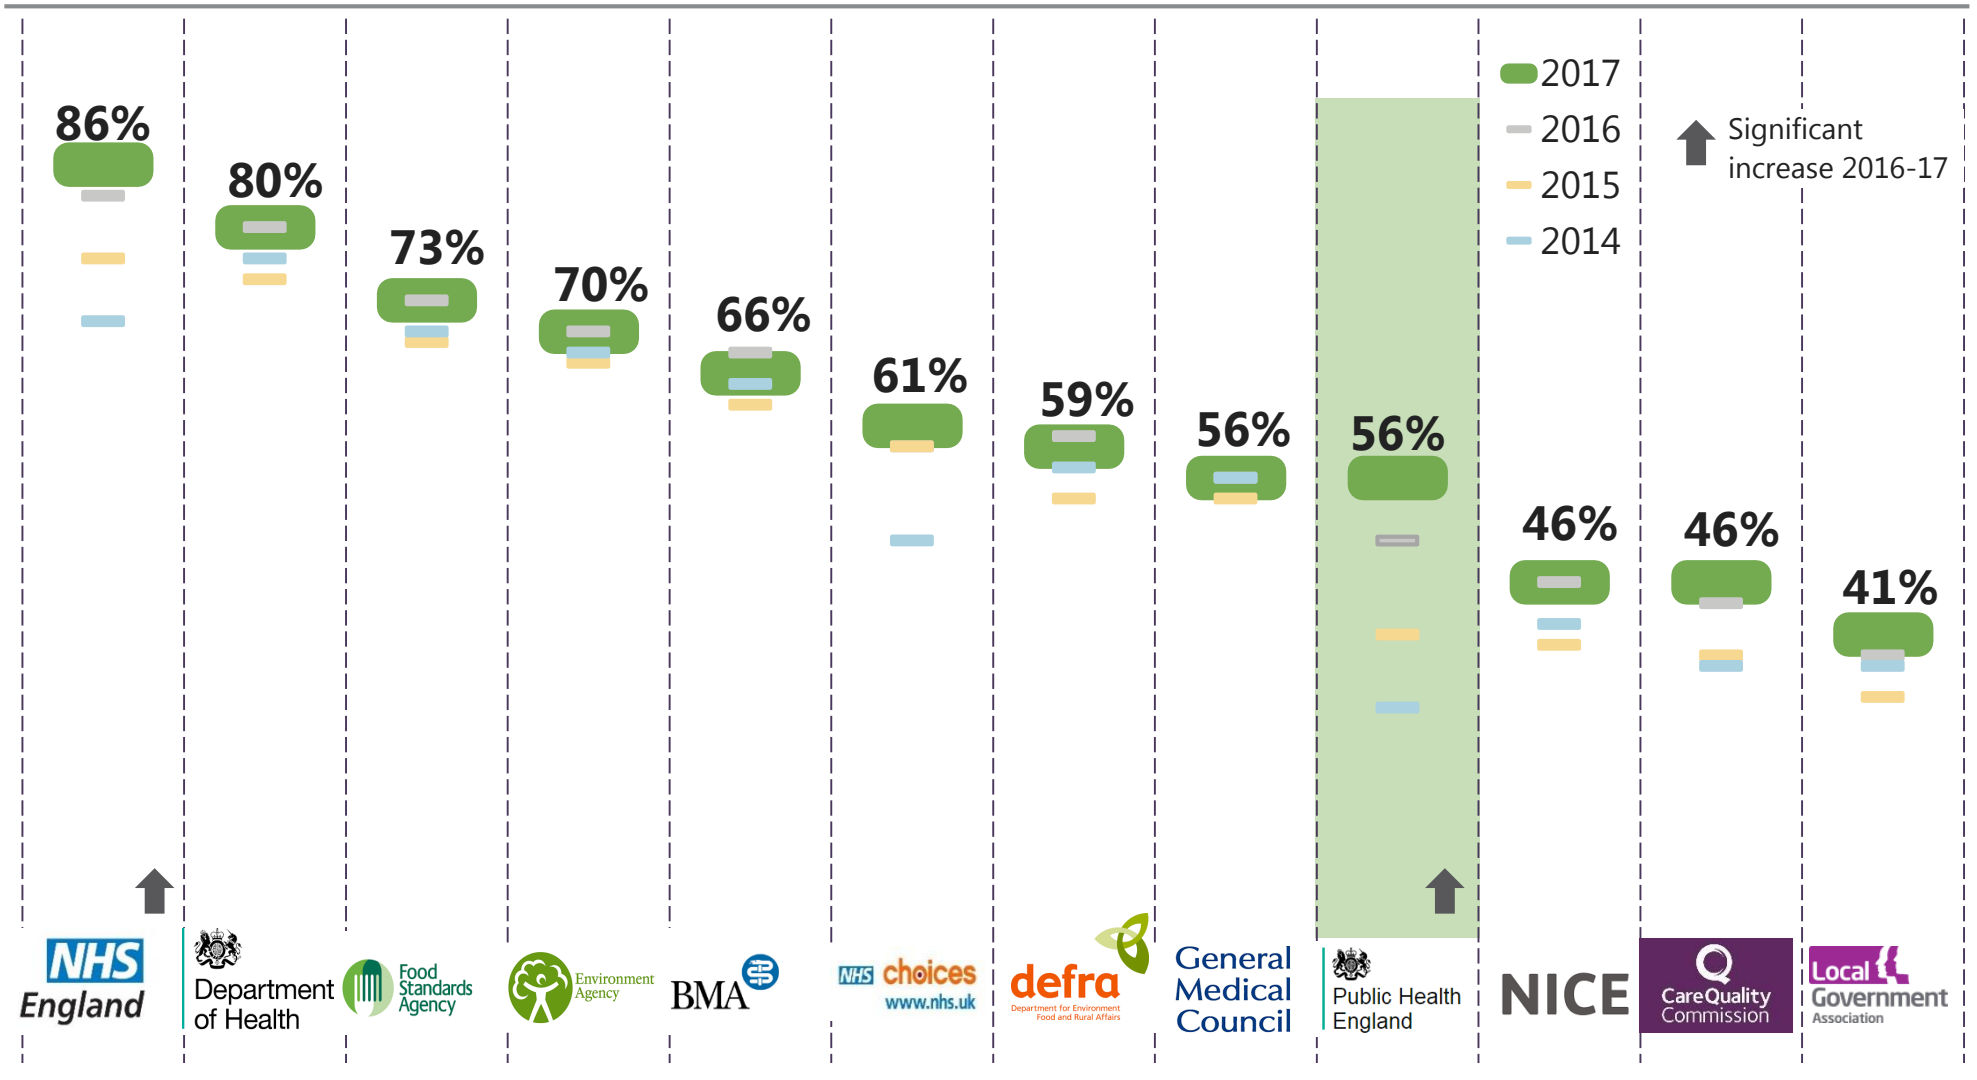

30% (n=520) willing to be contacted about PHE's People's Panel

Awareness and knowledge of PHE

Awareness of PHE continues to increase

Q8 Which, if any, of the following organisations have you heard of? (prompted)

Base: All participants (2017: 1,709, 2016: 1,640, 2015: 1,631, 2014: 1,625).

And so does perceived knowledge

Q12 How much, if anything, would you say you know about Public Health England/PHE?

Base: All participants (2017: 1,709, 2016: 1,640, 2015: 1,631, 2014: 1,625).

Ipsos Public Affairs

Awareness of PHE is primarily linked to age and social grade

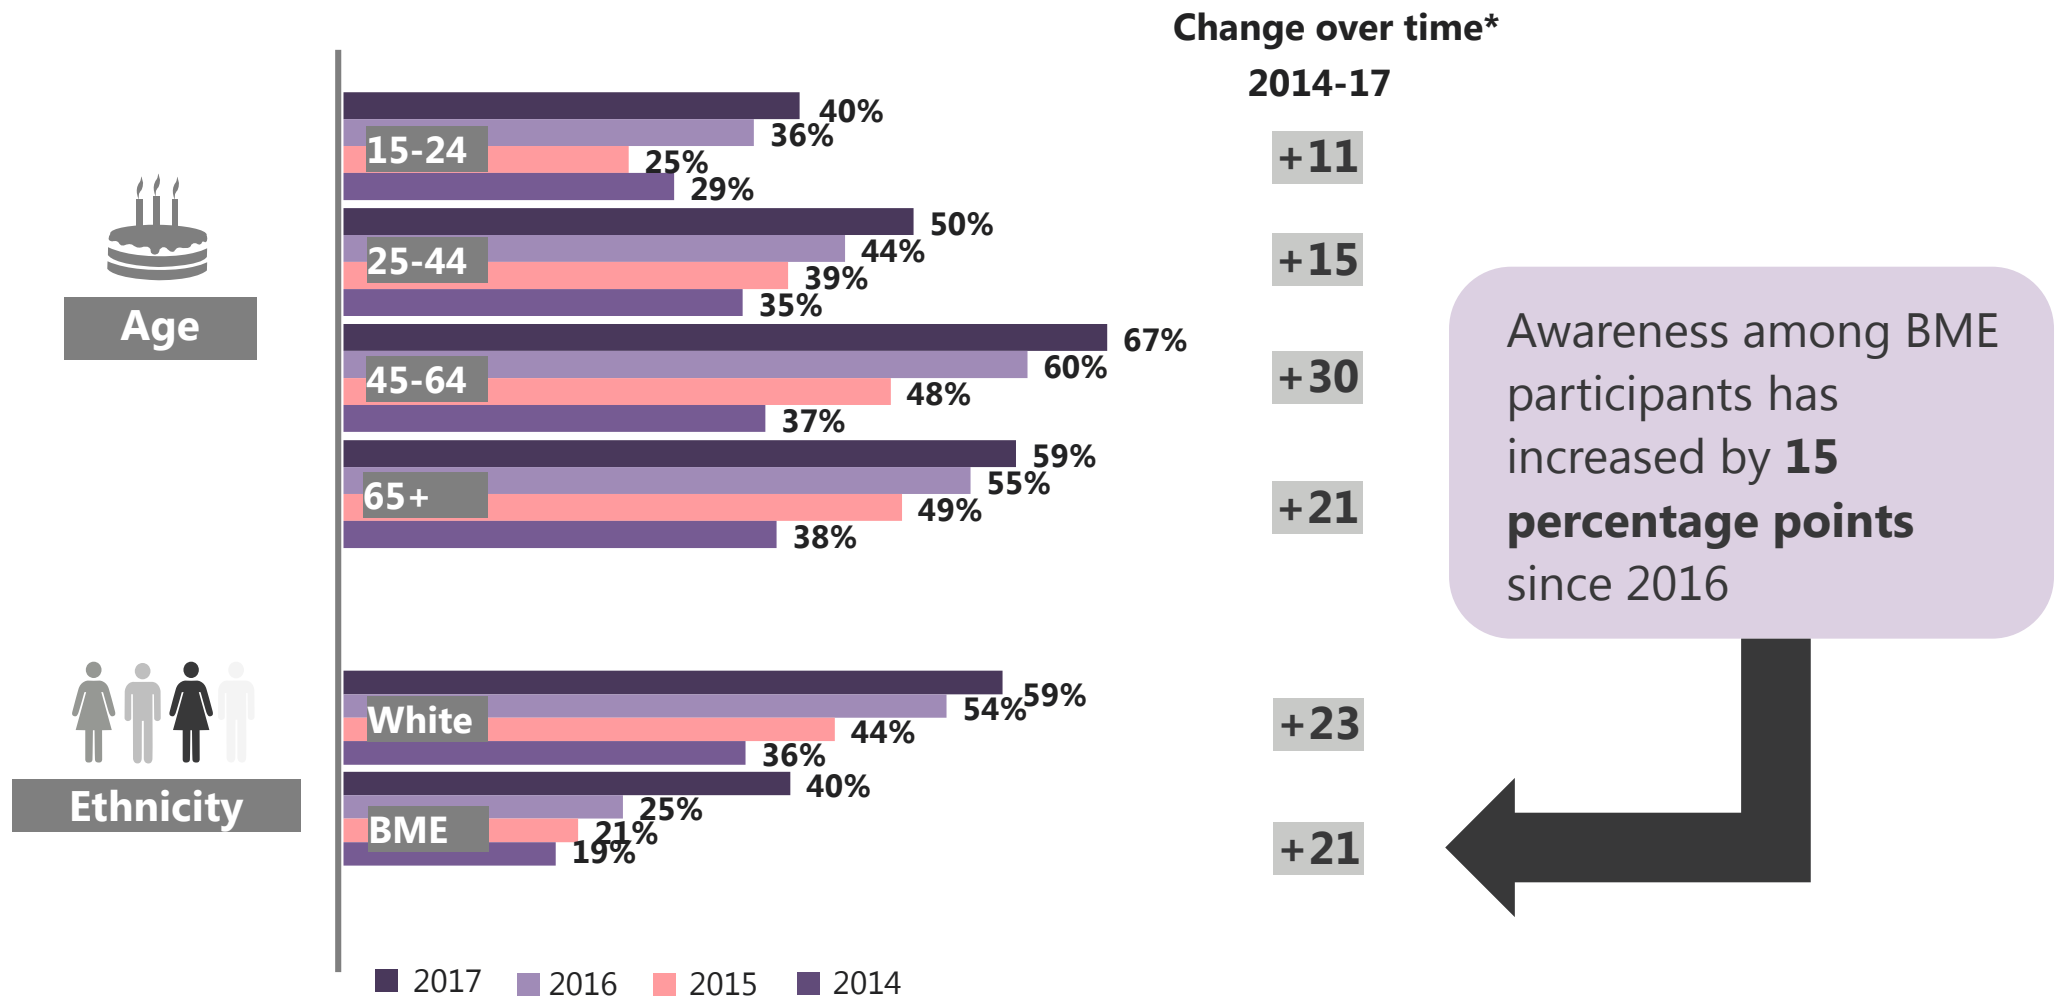

Q8 Which, if any, of the following organisations have you heard of? - PHE

All participants: 15-24 (267); 25-44 (469); 45-64 (501); 65+ (472); ABC1 (1,050) C2DE (659); Working/know someone working in healthcare (679); dose not (1,029); Informal carers (367); no caring responsibilities (1,342); White (1,540); BME (166); Working (802) Not working (907)

Greatest growth in awareness seen for older and BME groups

Q8 Which, if any, of the following organisations have you heard of? - PHE

All participants: 15-24 (2017: 267, 2016: 240; 2015: 263; 2014: 257); 25-44 (2017: 469, 2016: 459; 2015: 462; 2014: 486); 45-64 (2017: 501, 2016: 502; 2015: 496; 2014: 468); 65+ (2017: 472, 2016: 439; 2015: 410; 2014: 414); White (2017: 1,540, 2016: 1,374; 2015: 1,325; 2014: 1,338); BME (2017: 166, 2016: 264; 2015: 298; 2014: 282). *Percentage point difference.

But there is still some uncertainty over what PHE does

Q14 Looking at this list, which of the following do you think Public Health England/PHE does?
Please answer even if you are unfamiliar with the organisation (prompted)

Any correct answers
+15 since 2014

Any incorrect answers
+10 since 2014

Confidence and trust in advice

Ipsos Public Affairs

Public confidence in PHE's advice continues to increase

Q15 How confident would you be in the advice provided by Public Health England/PHE?

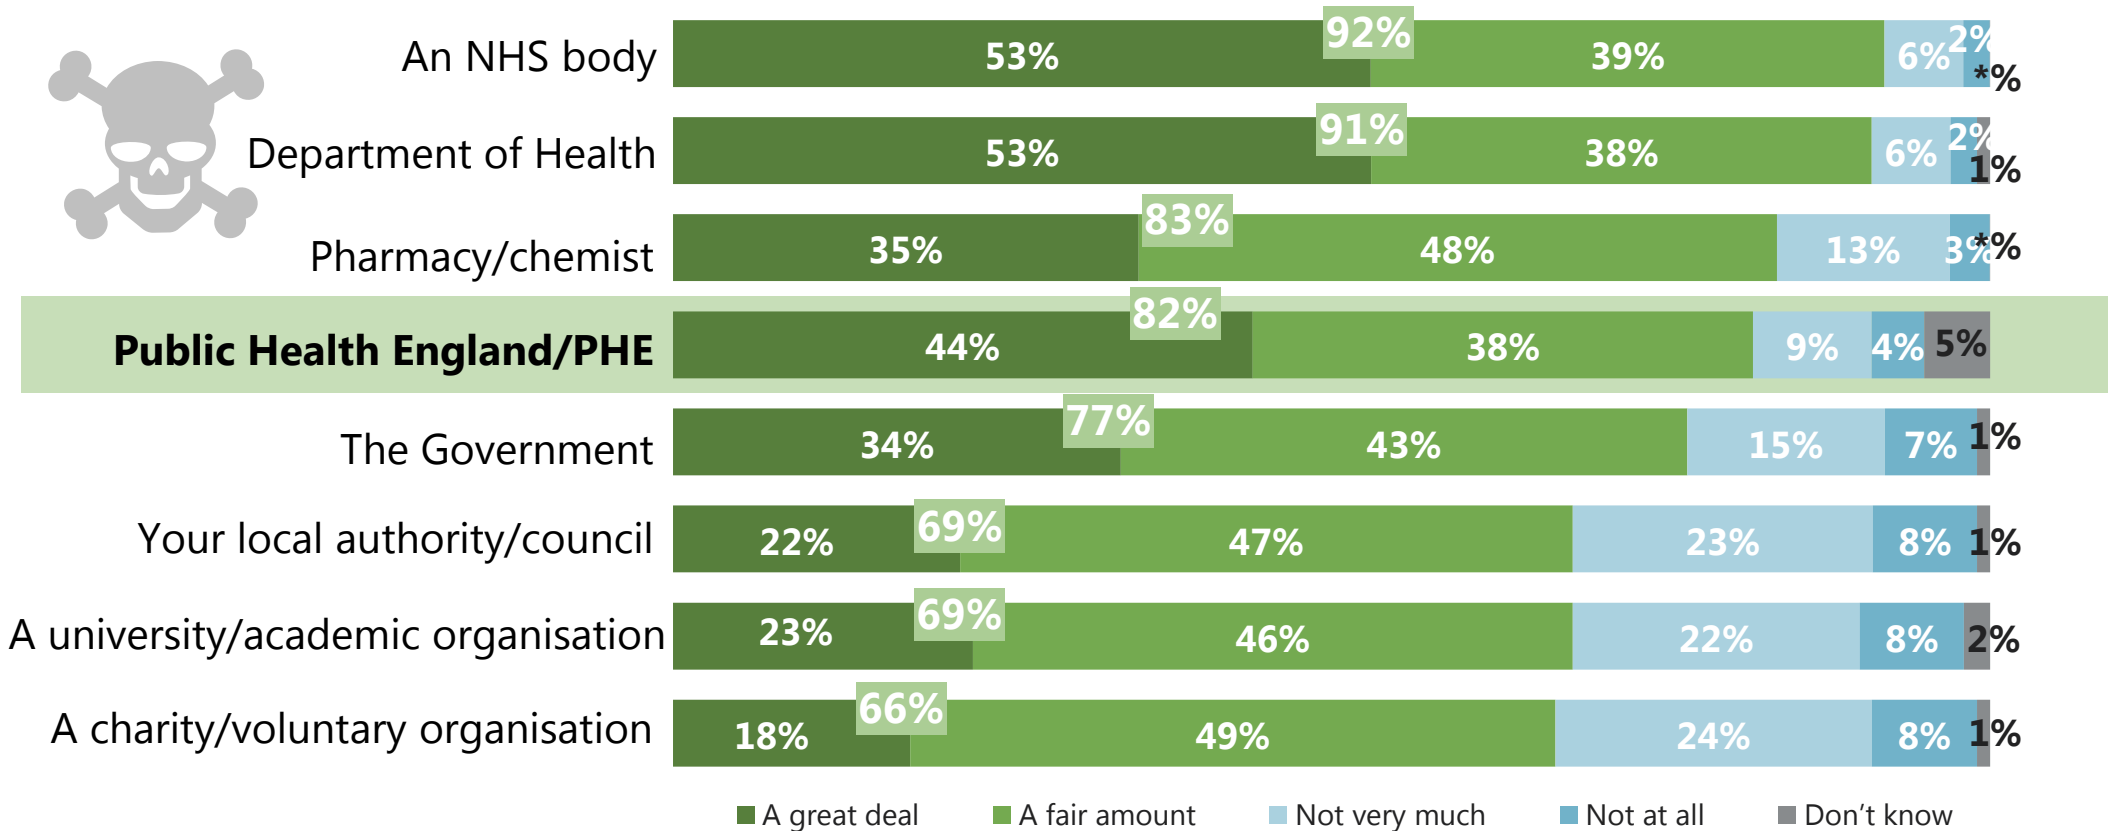

↑ ↓ Significant increase/decrease vs. previous year

Base: All participants (2017: 1,709, 2016: 1,640, 2015: 1,631, 2014: 1,625).

And PHE is considered trustworthy alongside other health bodies

Q11B To what extent would you trust advice about possible threats to your health from the following organisations/bodies?

Similar findings regarding advice on healthy living

Base: All participants (2017: 1,709)

Public health concerns

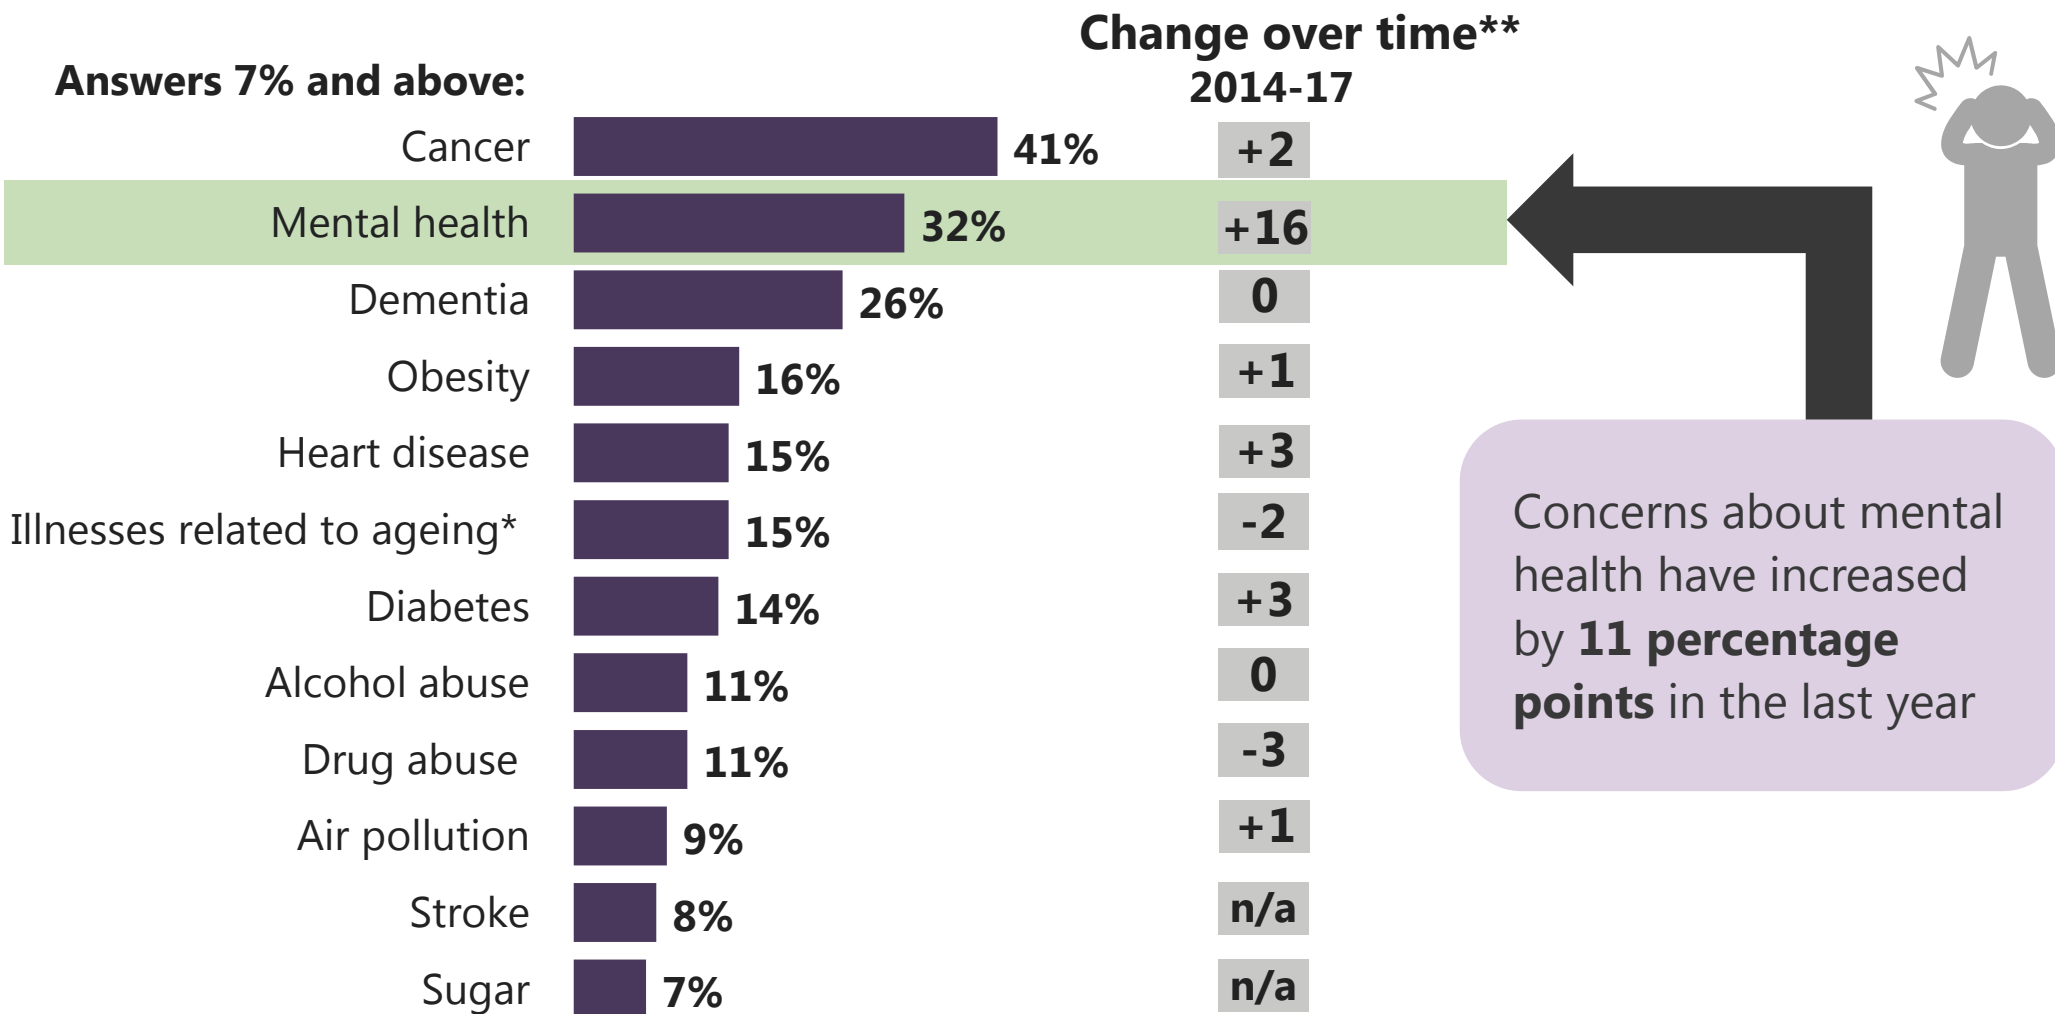

Ipsos Public Affairs

Concerns about mental health have grown significantly

Q3 Please tell me which, if any, of the following public health issues are you most concerned about these days? (Prompted)

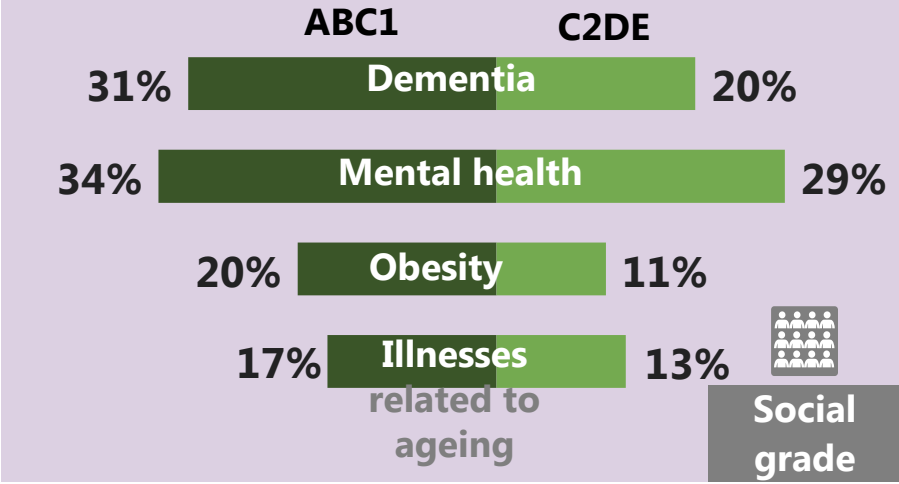

Base: All participants (2017: 1,709, 2014: 1,625). *Please note that in 2014 this code was worded 'age-related illnesses'. **Percentage point difference.

Ipsos Public Affairs

Public health concerns vary according to age, ethnicity and social grade

Q3 Please tell me which, if any, of the following public health issues are you most concerned about these days? (Prompted)

All participants: 15-24 (267); 25-44 (469); 45-64 (501); 65+ (472); ABC1 (1,050) C2DE (659); White (1540); BME (166). *Includes all naming one or more of the following: smoking, alcohol abuse, drug abuse.

Health interventions

Ipsos Public Affairs

People expect some government intervention in healthier living

Q24 Would you say the government does too much, too little, or does the right amount to help people lead healthier lifestyles?

Base: All participants: 2017: 1,709

But think individuals are primarily responsible for their health

Q26 How much responsibility, if any, do you think each of the following has in making sure people lead healthy lives?

Base: All participants (2017: 1,709)

People agree the government should address a variety of health issues

Q25 How much responsibility, if any, do you think the government has to address the following health issues?

Providing vaccines

Promoting awareness of health conditions

Working with industry to make food or drink healthier

Encouraging people to have healthier lifestyles

Supporting employers to help employees lead healthier lives

■ A great deal ■ A fair amount ■ Not very much ■ Not at all ■ Don't know

Base: All participants (2017: 1,709)

Ipsos Public Affairs

Sources of information

Ipsos Public Affairs

PHE is part of a key group of bodies expected to provide advice

Q9 Who or which organisation from this list, if any, do you think should provide you with information on how to stay healthy? (Answers 11% and above shown)

43% of those who know PHE a great deal/fair amount

Similar findings regarding advice on health threats

Base: All participants (2017: 1,709); know PHE a great deal/fair amount (268)

Conclusions and implications

Conclusions and implications

Awareness of PHE is at its highest, and is associated with trust and confidence in PHE

The public is not yet clear on exactly what PHE does – but this does not affect trust or confidence and thus does not represent cause for concern

The public are becoming **increasingly concerned about mental health**, particularly among younger age groups

This maps on to **PHE's focus on mental health** – including the new programme to train people in mental first aid

The public think there is **a role for both individuals and the government in public health** – but there is **less recognition of the role employers can play**

There is an expectation for government involvement though this is **subject specific**

PHE could do more to make **the public recognise the responsibilities of their employer**
