

# THE FUTURE OF AI-POWERED INSIGHTS

---

Menaka Gopinath and Vijay Renganathan

August 13, 2019

**GAME CHANGERS**

THIS IS NOT A STORY ABOUT HOW TECHNOLOGY  
CAN CONSTRUCT AND DELIVER INSIGHTS.

THIS IS A STORY ABOUT HOW TECHNOLOGY IS  
HELPING OUR TEAMS GET TO THOSE INSIGHTS  
**FASTER.**

VIJAY RENGANATHAN  
Director of Solutions Engineering  
Synthesio

MENAKA GOPINATH  
President  
Ipsos SMX, Social Intelligence  
Analytics & Communities

# FROM LISTENING TO INTELLIGENCE

## DIRECTIONAL

### LISTENING TOOL

- Volume
- Auto-sentiment
- Topics and word cloud

## TACTICAL

### MARKETING AGENCY

- Campaign focus
- Social activity, engagement
- Likes, comments, shares
- Consumer behavior related to marketing programs

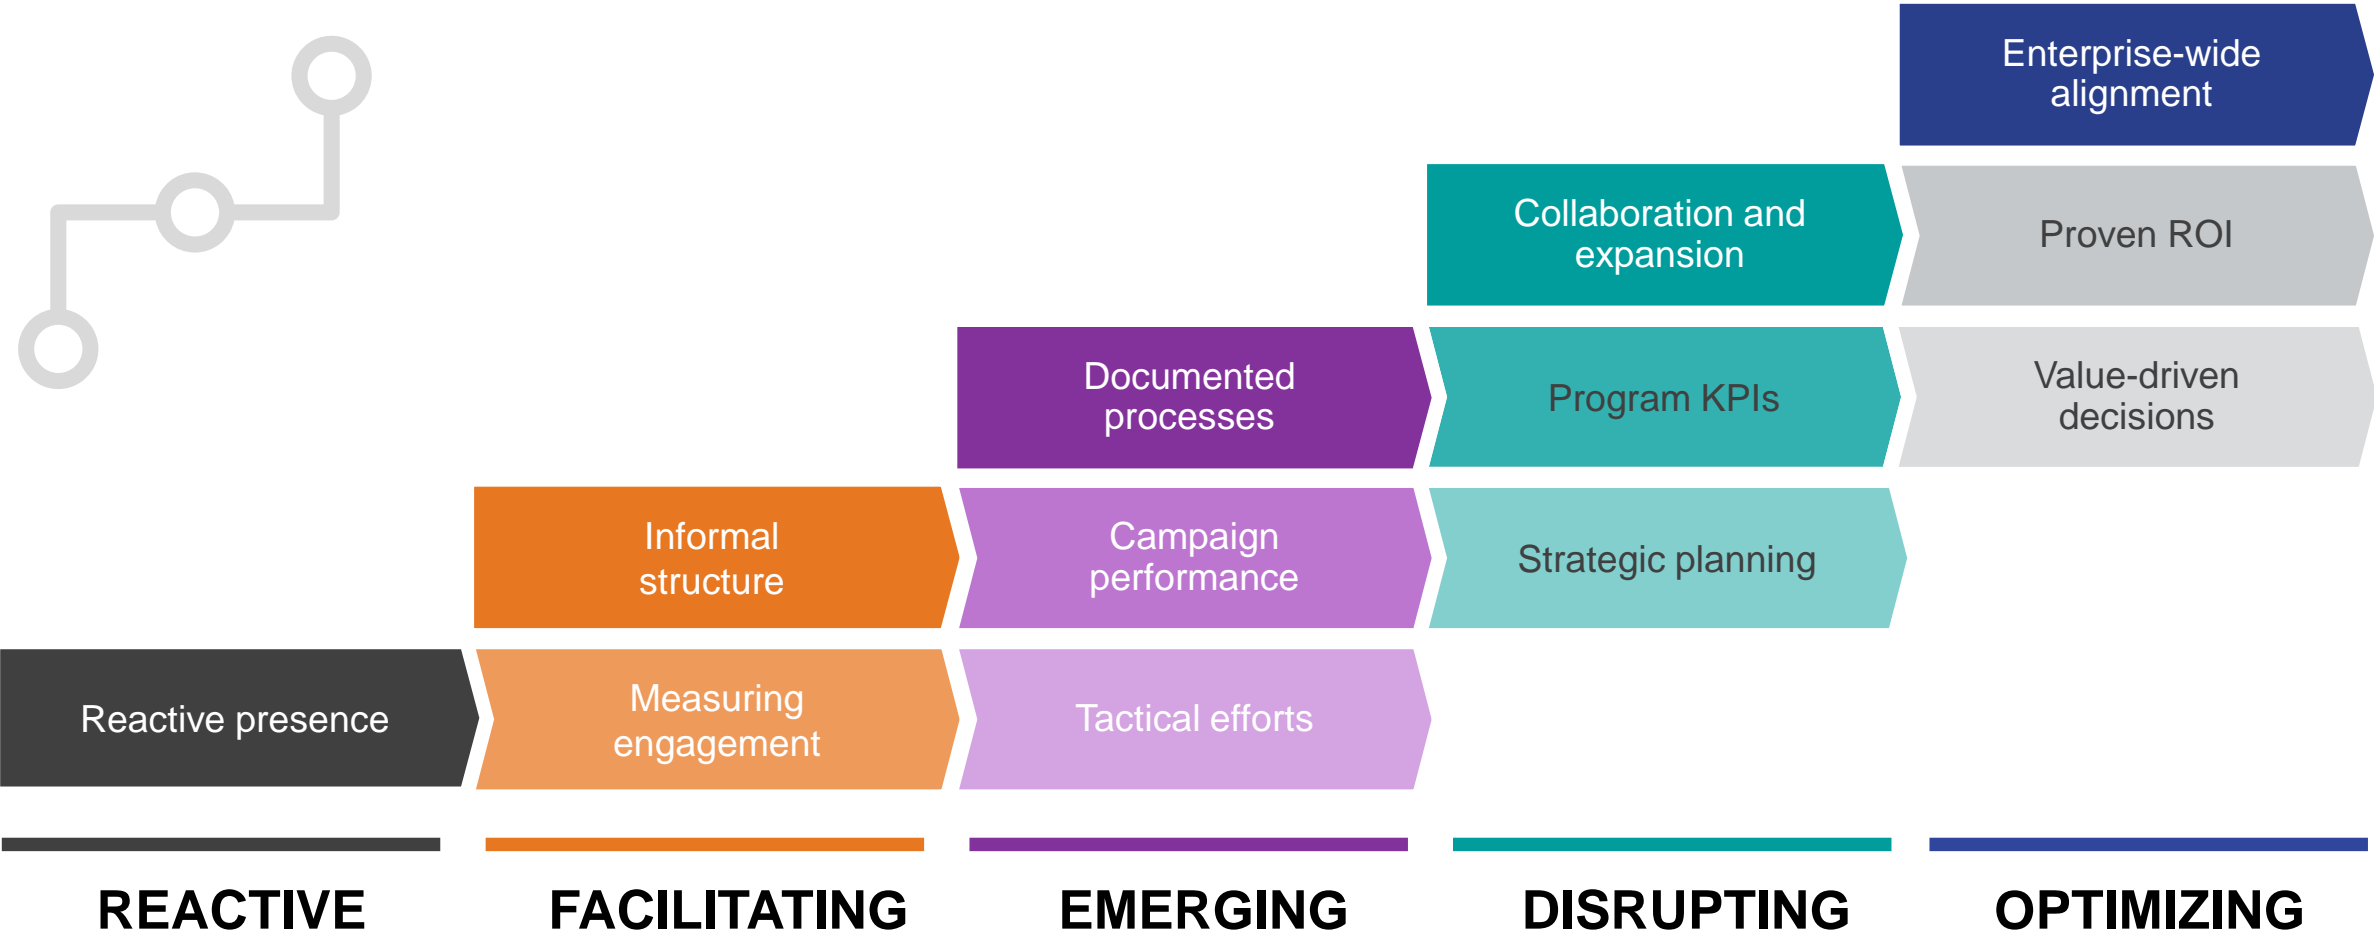

## STRATEGIC

### SOCIAL INTELLIGENCE

- Consumer focus
- Advanced text analytics
- Humanized A.I.
- Strategic frameworks

# SOCIAL MATURITY MODEL

# THREE KEY ELEMENTS TO SIA

## DATA COLLECTION

- Synthesio SAAS platform
- Support / training on platform use

## DATA ANALYTICS

- Custom data science
- Advanced text and image analytics

## DATA STORYTELLING

- Reporting and advisory
- Category expertise & connected insights

Ipsos acquired  
Synthesio to ensure  
the best data  
collection and  
technology solution to  
support the delivery of  
best in class social  
intelligence.

Loic Moisand  
Co-Founder & CEO of Synthesio

**Synthesio has launched Signals  
which unites leading social media  
intelligence technology with  
decades of Ipsos leadership in data  
science and consumer insights.**

# FO ■ MO

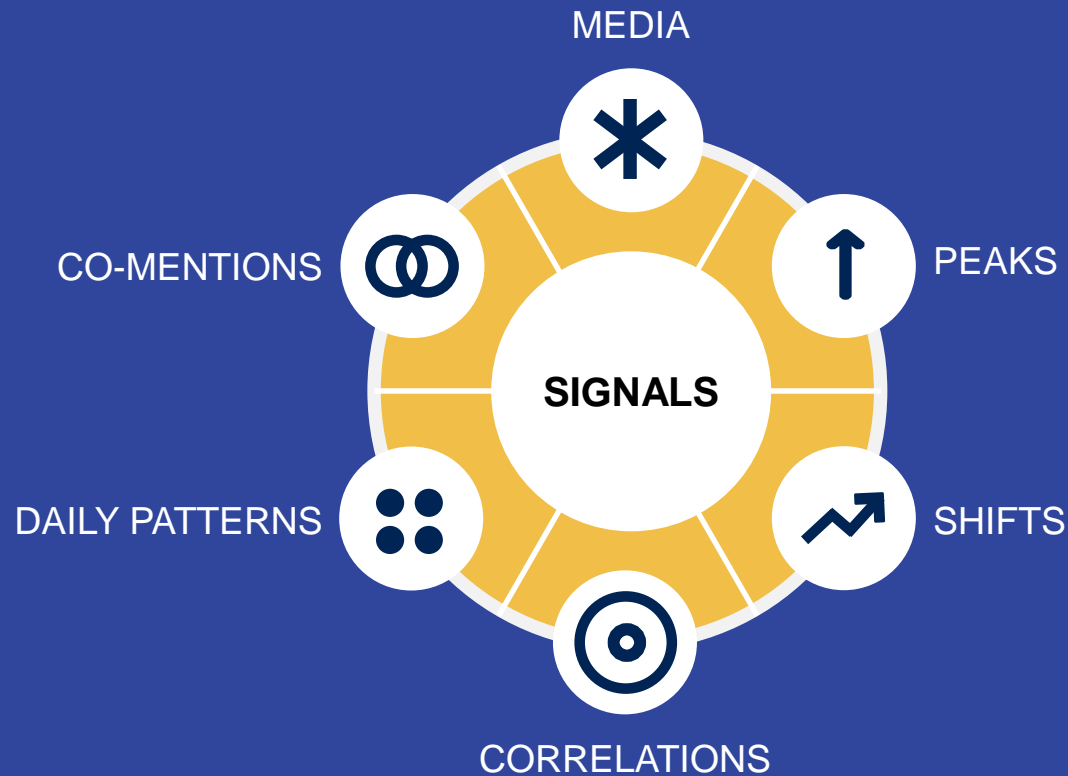

## FEAR OF MISSING OUT

Anxiety that an exciting or interesting event may currently be happening elsewhere.

**Like most business leaders, you have likely experienced the fear of missing critical consumer insights that will impact your business.**

**Social Listening Platforms have been great for collecting consumer data, yet have struggled to proactively surface signals for actionable insights.**

# SIGNALS WILL CHANGE THE WAY YOU WORK.

**By surfacing all major statistical events and patterns happening online**

**By overcoming dashboard overload, with infinite widgets to review**

**By allowing anyone to detect anomalies and ask for further investigation**

# SEE WHAT SIGNALS CAN SURFACE FOR YOU

## SHIFTS

Spot longer-lasting shifts over a selected period of time.

## CORRELATIONS

Review interdependence between the evolution of topics.

## CO-MENTIONS

Identify which topics tend to be mentioned together in online conversations.

## PEAKS

Overview of days, weeks and months with unusual peaks of mentions, interactions or impressions.

## DAILY PATTERNS

Identify which days of the week people are most likely to mention a topic.

## MEDIA

Check out all videos and images that are going viral.

# LET'S TAKE A LOOK AT SIGNALS IN ACTION

STAYING AHEAD IN THE BEAUTY CATEGORY

# Scenario: what are key drivers related to general K-Beauty conversations?

## “Traditional” Detection

- Eyeball-driven or at best counting-number driven
- K-Pop most significant topic mentioned in the category; Masks also important

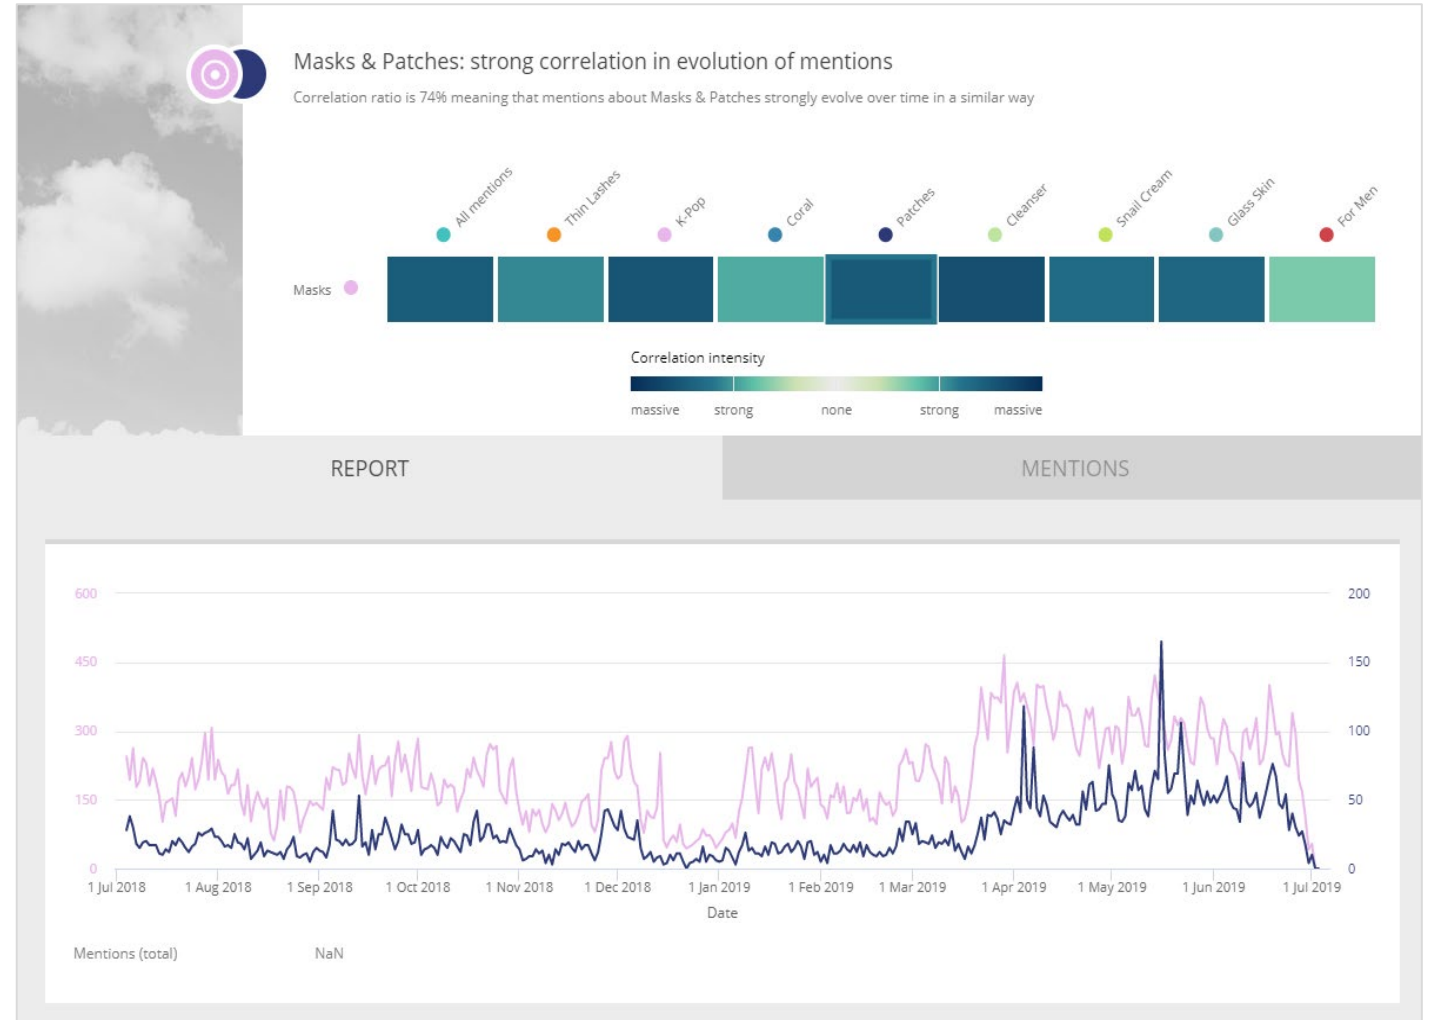

# Scenario: what are key drivers related to general K-Beauty conversations?

## Detection Using Signals

- Significance-based detection and analysis
- Correlation in evolution of category conversation with Masks, Cleanser & Patch topics, as well as with each other

Signals highlights the importance of lower volume topics via previously unavailable in-tool statistical analysis

# WHAT IS THE OPPORTUNITY WITH MASKS AND PATCHES?

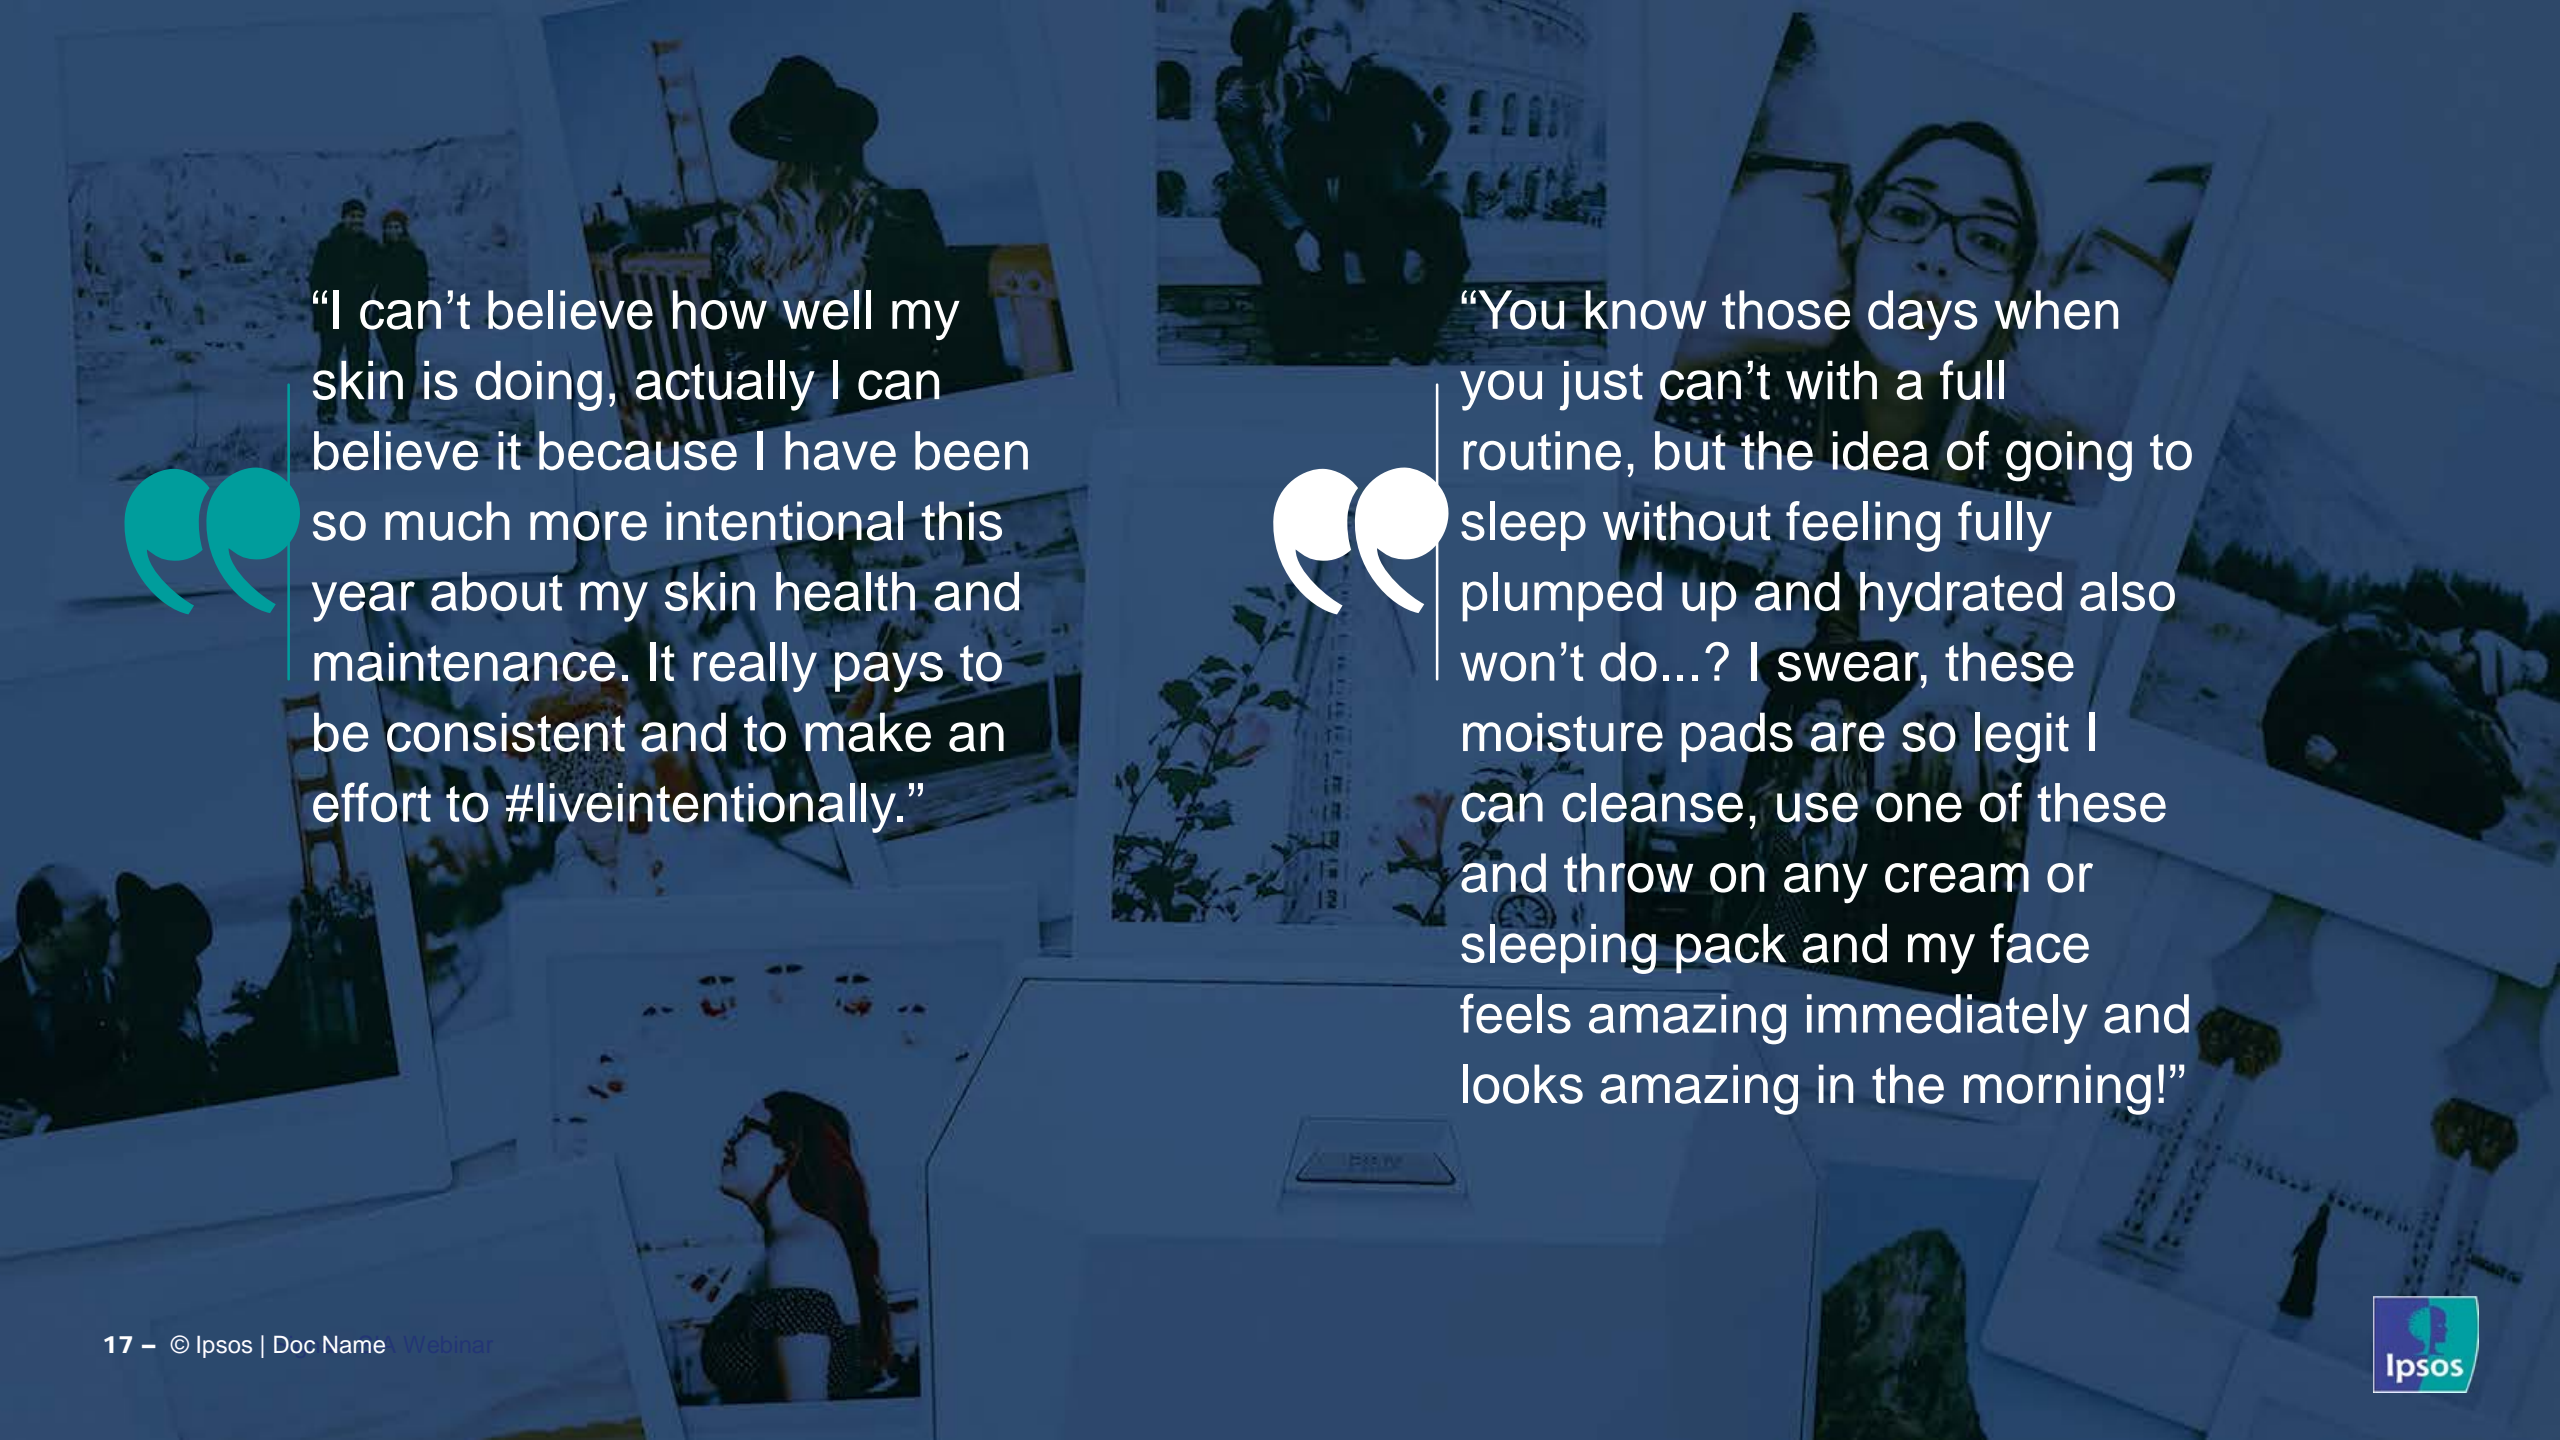

---

LET'S TAKE A DEEPER LOOK

“I can’t believe how well my skin is doing, actually I can believe it because I have been so much more intentional this year about my skin health and maintenance. It really pays to be consistent and to make an effort to #liveintentionally.”

“You know those days when you just can’t with a full routine, but the idea of going to sleep without feeling fully plumped up and hydrated also won’t do...? I swear, these moisture pads are so legit I can cleanse, use one of these and throw on any cream or sleeping pack and my face feels amazing immediately and looks amazing in the morning!”

## TWO KEY POINTS:

- Put skin first
- Make it easy

## SOME TAKEAWAYS

## 1 GO BEYOND YOUR BRAND

The rich learning social data can provide goes well beyond your brand and even category.

## 2 GO BEYOND THE DATA

Applying machine learning, advanced analytics and human intelligence delivers powerful learning.

### 3 IT'S NOT FOR EVERYTHING

Social intelligence is an essential research tool when used well and applied to the right learning needs.

# COMING SOON TO SIGNALS

## MORE SIGNALS

- Influencer detection
  - Advocates
  - Detractors
- Geo trends
- Trending words & hashtags

## MORE SHARING

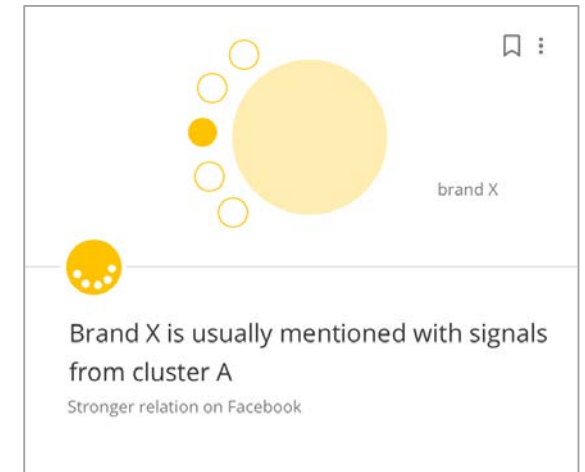

- Feed PDF export
- Contextual report PDF export
- Permanent URL sharing
- Report bookmarks

## ENHANCED CONTEXT

- Advanced location
- Influencer analytics
- Subtopic signals
- Richer drill-down capabilities

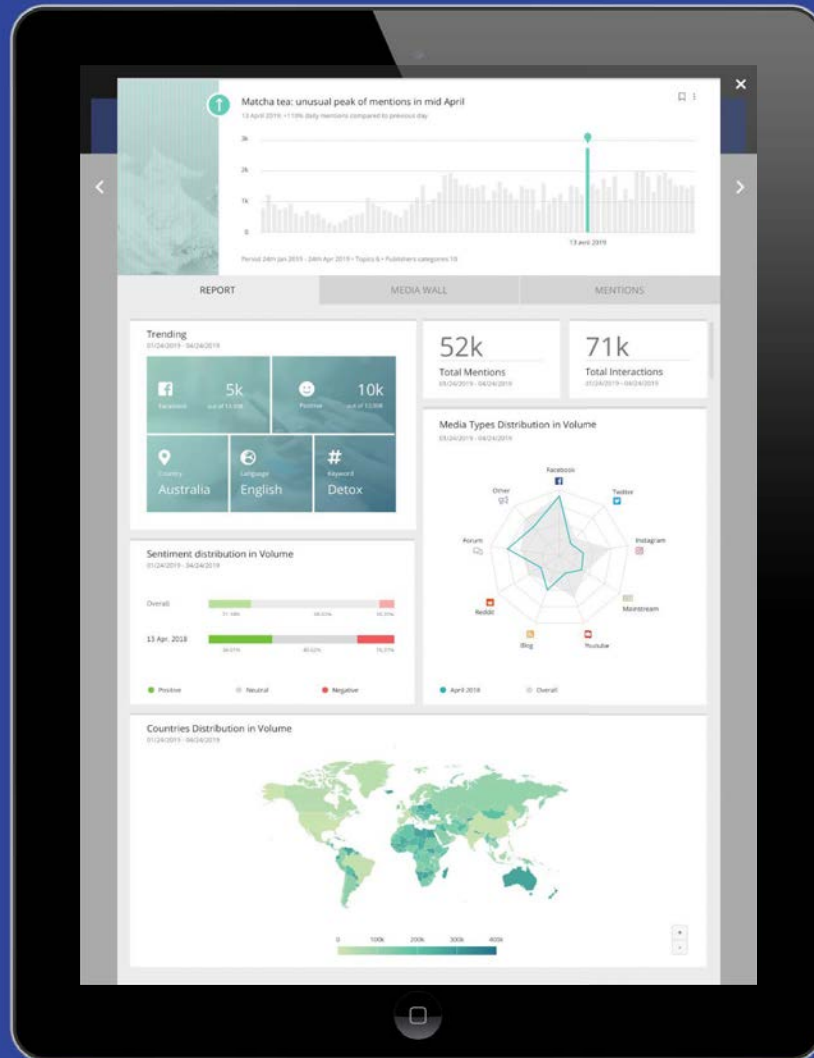

## ADDITIONAL NLP

- Top adjectives by topic
- Top entities by topic
- Phrase extraction
- Emerging topics

# LEARN MORE ABOUT SIGNALS!

Use Signals within the Synthesio Social Intelligence suite to enhance time to insight and detect what's happening behind pure volumes.
