GLOBAL VIEWS ON VICES – 2019 IPSOS GLOBAL ADVISOR

© 2019 Ipsos. All rights reserved. Contains Ipsos' Confidential and Proprietary information and *may not be* disclosed or reproduced without the prior written consent of Ipsos.

Methodology

- The findings come from surveys conducted between November 26 and December 7, 2018 on the Ipsos global advisor platform using the Ipsos online panel system with 18,638 adults across 29 countries: Argentina, Australia, Belgium, Brazil, Canada, Chile, China, Colombia, France, Germany, Great Britain, Hungary, India, Italy, Japan, Malaysia, Mexico, Peru, Poland, Romania, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey, and the U.S.
- All survey respondents are aged 18-64 in Canada and the U.S. and 16-64 in all other countries.
- The sample size per country in each survey is approximately n=1,000 for Australia, Brazil, Canada, China, France, Germany, Great Britain, India, Italy, Japan, Spain, and the U.S. And approximately N=500 for Argentina, Belgium, Chile, Colombia, Hungary, Malaysia, Mexico, Peru, Poland, Romania, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Sweden, and Turkey.
- Weighting has been employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most recent country census data.

- A survey with an unweighted probability sample of this size would have an estimated margin of error of +/- 3.5 percentage points for a sample of 1,000 and an estimated margin of error of +/- 5.0 percentage points for a 500 sample 19 times out of 20.
- In 17 of the countries surveyed, internet penetration is sufficiently high to think of the samples as representative of the national population within the age ranges covered: Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, Great Britain, and the U.S.
- Brazil, Chile, China, Colombia, India, Malaysia, Mexico, Romania, Russia, Peru, Saudi Arabia, South Africa, and Turkey have lower levels of internet penetration. Samples from those countries should not be considered to be fully nationally representative, but instead to represent a more affluent, connected population, representing an important and emerging middle class.
- Results may not always sum to 100% or may be 1 point higher/lower than the actuals due to rounding, multiple responses or the exclusion of don't knows or not stated responses.

GAME CHANGERS

At Ipsos we are passionately curious about people, markets, brands and society. We deliver information and analysis that makes our complex world easier and faster to navigate and inspires our clients to make smarter decisions.

We believe that our work is important. Security, simplicity, speed and substance applies to everything we do.

Through specialisation, we offer our clients a unique depth of knowledge and expertise. Learning from different experiences gives us perspective and inspires us to boldly call things into question, to be creative.

By nurturing a culture of collaboration and curiosity, we attract the highest calibre of people who have the ability and desire to influence and shape the future.

"GAME CHANGERS" – our tagline – summarises our ambition.
