Response to COVID-19

Responding to COVID-19 in African Countries:

Data Deck of Polling Results: South Africa

August 2020

INTRODUCTION

The COVID-19 pandemic continues to impact societies across health, financial and day to day life.

This document provides the findings from public opinion polls in South Africa to understand the public's knowledge, risk perception, attitudes, access to information, reactions, behaviors and practices related to COVID-19.

This Data Deck is supplemented by an Executive Summary of the findings by country.

METHODOLOGY

The public opinion poll in South Africa was conducted between 3 August and 17 August 2020. The polling was conducted by telephone.

Samples were drawn to be nationally representative of each Member State; weighting was applied by gender and region to align the final data with the population. The unweighted national sample size in South Africa is 1,395 interviews.

Additional Methodology Details

- The public opinion polling was conducted using a telephone interviewing methodology.
- The questionnaire was developed by Resolve to Save Lives, Ipsos and members of the PERC consortium.
- The polling program was approved by local review boards and all respondents gave explicit permission to participate in the polling.
- Note that where referenced, income categories should be interpreted as indicative as sample sizes vary and income reporting can be subject to bias.
- The weighted sample sizes for the demographic breaks in this report are as follows:

	Total	Male	Female	18-25	26-35	36-45	46-55	56+	Urban	Rural	Under 100	101 - 200	201 - 500	501+
Base: All	1200	621	579	240	415	321	133	91	588	612	147	145	195	250

- The percentages reported in this document may be different from percentages reported in other PERC products and communication of this data. Differences may be reconciled by investigating the denominator used, as indicated in each instance of use.

Social cohesion

Q10c. There are public health guidelines recommended to restrict the spread of coronavirus. These include maintaining a minimum distance from people you are not in contact with regularly and limiting the number of people who can gather together. Which is closer to your point of view about these recommended actions?

Loosening restrictions now versus getting the economy moving

Q16. Some people say that loosening restrictions now puts too many people at risk of contracting COVID-19 and we need to wait at least a few more weeks. Other people say that the health risk is minimal if people follow social distancing rules and we need to get the economy moving again. Which is closer to your point of view?

		Gender		Age					Urbanity		Household Monthly Income (USD)			
	Total	Male	Female	18-25	26-35	36-45	46-55	56+	Urban	Rural	Under 100	101 - 200	201 - 500	501+
