Data Deck of Polling Results: Guinea Conakry

September 2021

The National  
Academies of  
SCIENCES  
ENGINEERING  
MEDICINE

# INTRODUCTION

This deck provides the survey results for Guinea Conakry and should be used as a reference document.

This is the fourth poll and analysis conducted since the pandemic began. The first poll occurred in May 2020, the second in August 2020, and the third in February 2021. Results of the second survey (S2) and third survey (S3) are provided for tracking purposes against this fourth survey (S4) where the questions are comparable. Results from the first poll are not included as the first poll was done in urban centers only and cannot be compared to the national polls conducted in the second and third polls.

The published reports for the second, third and fourth surveys can be found here: <https://preventepidemics.org/covid19/perc/>

# METHODOLOGY

This fourth public opinion poll in Guinea Conakry was conducted from 18 September 2021 to 2 October 2021.

The polling was conducted by telephone. Samples were drawn to be nationally representative of the population with access to a landline or cell phone in each Member State. Weighting was applied by gender and region to align the final data with the population.

The unweighted national sample size in Guinea Conakry is 1241 interviews. The weighted sample size is 1,200 interviews.

The regional comparison for Guinea Conakry is the Western region which includes Cote d'Ivoire, Ghana, Liberia, Nigeria and Senegal.

# Had difficulty getting medications (rebased to those needing medication)

Q25. Thinking about the last 3 months, has the COVID-19 crisis made it more difficult to obtain medications you need for you or your household or has it had no impact? If you do not need medications, please say so.
