## Data Deck of Polling Results: South Africa

September 2021

The National  
Academies of  
SCIENCES  
ENGINEERING  
MEDICINE

# INTRODUCTION

This deck provides the survey results for South Africa and should be used as a reference document.

This is the fourth poll and analysis conducted since the pandemic began. The first poll occurred in May 2020, the second in August 2020, and the third in February 2021. Results of the second survey (S2) and third survey (S3) are provided for tracking purposes against this fourth survey (S4) where the questions are comparable. Results from the first poll are not included as the first poll was done in urban centers only and cannot be compared to the national polls conducted in the second and third polls.

The published reports for the second, third and fourth surveys can be found here: <https://preventepidemics.org/covid19/perc/>

# METHODOLOGY

This fourth public opinion poll in South Africa was conducted from 10 September 2021 to 29 September 2021.

The polling was conducted by telephone. Samples were drawn to be nationally representative of the population with access to a landline or cell phone in each Member State. Weighting was applied by gender and region to align the final data with the population.

The unweighted national sample size in South Africa is 1266 interviews. The weighted sample size is 1,200 interviews.

The regional comparison for South Africa is the Southern region which includes Mozambique, Zambia and Zimbabwe.

# Socio Demographic Table

	Country		Sex		Age				Household location

# Impact on health care: Most recent personal/household missed health care visit

**Combining Q20 and Q23:**

- Q20 When was the last time you personally delayed, skipped or were unable to complete a health care visit?
- Q23 When was the last time any other person in your household delayed, skipped or were unable to complete a health care visit?

# Had difficulty getting medications (rebased to those needing medication)

Q25. Thinking about the last 3 months, has the COVID-19 crisis made it more difficult to obtain medications you need for you or your household or has it had no impact? If you do not need medications, please say so.

# Contact with others: in other places

*Q27. Over the last 24 hours how many people have you had contact with? Please include people you have been within two meters of and exchanged at least a few words OR had physical contact with. Please do not include people whom you have only passed by on the street, while using public transportation, or in a market without speaking to. We would like you to think about the following settings...?*

## d) People in other places

						Gender		Age					Household location		Monthly Income		Have / intend to vaccinate		Missed Health Care Visit	
	All Countries	Southern	S4	S3	S2	Male	Female	18-25	26-35	36-45	46-55	56+	Urban	Rural	Low Income	High Income	Yes	No	Since March	Since Pandemic start
