Responding to COVID-19 in African Member States:

Data Deck of Polling Results: Tunisia

September 2021

The National
Academies of
SCIENCES
ENGINEERING
MEDICINE

INTRODUCTION

This deck provides the survey results for Tunisia and should be used as a reference document.

This is the fourth poll and analysis conducted since the pandemic began. The first poll occurred in May 2020, the second in August 2020, and the third in February 2021. Results of the second survey (S2) and third survey (S3) are provided for tracking purposes against this fourth survey (S4) where the questions are comparable. Results from the first poll are not included as the first poll was done in urban centers only and cannot be compared to the national polls conducted in the second and third polls.

The published reports for the second, third and fourth surveys can be found here: <https://preventepidemics.org/covid19/perc/>

METHODOLOGY

This fourth public opinion poll in Tunisia was conducted from 20 September 2021 to 27 September 2021.

The polling was conducted by telephone. Samples were drawn to be nationally representative of the population with access to a landline or cell phone in each Member State. Weighting was applied by gender and region to align the final data with the population.

The unweighted national sample size in Tunisia is 1197 interviews. The weighted sample size is 1,200 interviews.

The regional comparison for Tunisia is the Northern region which includes Morocco and Egypt.

Socio Demographic Table

| | Country | Sex | | Age | | | | | Household location | |

Contact with others: in household

Q27. Over the last 24 hours how many people have you had contact with? Please include people you have been within two meters of and exchanged at least a few words OR had physical contact with. Please do not include people whom you have only passed by on the street, while using public transportation, or in a market without speaking to. We would like you to think about the following settings...?

a) People within your household (INTERVIEWER: This means people within the respondents' household, not visitors)

| | | | | | | Gender | | Age | | | | | Household location | | Monthly Income | | Have / intend to vaccinate | | Missed Health Care Visit | |
