Q6. As you may know, the Government is reducing the amount of housing benefit that those living in social housing (those renting from a council or housing association) receive if they have more bedrooms than they need – for example, a couple with no children would have their benefits cut if they had more than one bedroom. Before starting to complete this survey how much, if anything, did you know about this change?

Ipsos MORI

Q6. As you may know, the Government is reducing the amount of housing benefit that those living in social housing (those renting from a council or housing association) receive if they have more bedrooms than they need – for example, a couple with no children would have their benefits cut if they had more than one bedroom. Before starting to complete this survey how much, if anything, did you know about this change?

Q6. As you may know, the Government is reducing the amount of housing benefit that those living in social housing (those renting from a council or housing association) receive if they have more bedrooms than they need – for example, a couple with no children would have their benefits cut if they had more than one bedroom. Before starting to complete this survey how much, if anything, did you know about this change?

Ipsos MORI

Q10. The cap on benefits only applies to households with working age benefit claimants, that is households in which one of the adults is below retirement age with no-one in work. There are some exemptions; do you support or oppose capping the total amount of benefits that any household can receive?

Q12. To what extent do you agree or disagree with these statements? Capping the total amount of benefits that any household can receive at £26,000 a year... - ...is fair if it means that households with no-one in work cannot receive more in benefits than the average amount working households receive in pay after tax?

Q12. To what extent do you agree or disagree with these statements? Capping the total amount of benefits that any household can receive at £26,000 a year... - ...is fair if it means that households with no-one in work cannot receive more in benefits than the average amount working households receive in pay after tax?

All Adults aged 16-75 in UK
