9a. President Bush has proposed that workers who are currently under age 55 should be given the option of investing a portion of their Social Security taxes in the stock market and in bonds, while at the same time reducing the guaranteed Social Security benefit they get when they retire. Depending on what happens to those investments in stocks and bonds, their Social Security benefit could be higher or lower. Do you support or oppose this proposal?

Some people have proposed that workers who are currently under age 55 should be given the option of investing a portion of their Social Security taxes in the stock market and in bonds, while at the same time reducing the guaranteed Social Security benefit they get when they retire. Depending on what happens to those investments in stocks and bonds, their Social Security benefit could be higher or lower. Do you support or oppose this proposal?
