

Artemis Global Card Study

Country Banner Table of Contents

1	COUNTRY
2	QA. Please indicate your gender.
3	QB. Please indicate your age.
4	Q1. The first possible rule change is described below. Please read the description, and some possible advantages and disadvantages, listed. Then indicate on the answer grid whether you feel the potential change would make using credit, debit and pre-paid cards better or worse for consumers.
5	Q2. Which of the following do you feel are fair when it comes to interchange fees (the costs associated with providing the technology and security of card payments that retailers pay to banks)?
6	Q3. If the EU passes legislation that reduces interchange fees (the fees that retailers pay for the access to payment card networks and benefits), what do you think retailers will do as a result?
7	Q4. A new rule that would allow banks to offer credit and debit cards with multiple payment network logos on the same card - such as Visa, MasterCard or other domestic networks. Retailers and consumers could choose which network they want to use for the transaction. Overall this change would make using credit, debit and pre-paid cards...
8	Q5. A new rule that would enable the EU to impose inflexible interchange caps on some electronic payment networks such as Visa and MasterCard, but not on others such as American Express, PayPal and other networks. Overall this change would make using credit, debit and pre-paid cards...
9	Q6. A new rule that would give retailers the right to decide which specific cards they will or will not accept even among cards carrying the same network logos (such as Visa or MasterCard). For example some credit and debit cards with the same logos may offer different levels of reward points, cash back and fraud protection, etc. Higher levels of consumer benefits usually come with a higher interchange rate for the retailer. Currently, if a retailer accepts any Visa card, they must accept all types of Visa cards. The same is true for MasterCard cards. Overall this change would make using credit, debit and pre-paid cards...
10	Q7. A new rule that would allow banks to encode a person's personal bank account number onto their debit card so that the funds for debit transactions could come directly from the person's account rather than passing through a secure electronic payment network such as those offered by Visa or MasterCard. Overall this change would make using credit, debit and pre-paid cards...
11	Q1/Q4/Q5/Q6/Q7. Better for consumers - Summary table
12	Q1/Q4/Q5/Q6/Q7. Worse for consumers - Summary table
13	Q1/Q4/Q5/Q6/Q7. Better for consumers - Any Summary table
14	Q1/Q4/Q5/Q6/Q7. Worse for consumers - Any Summary table
15	Q8. Which of the following, if any, have you done in the past 5 years?
16	Q9. Which of the following payment cards, if any, do you own?
17	QC. Which of the following best describes your employment status?
18	QD. What is your marital status?
19	QE. Are there any children under the age of 18 living in your household?
20	QF. What is the highest level of formal education that you have completed?
21	QG. What is your net monthly household income? - Croatia
22	QG. Into which category does your total household pre-tax annual income from all sources fall? - Czech Republic
23	QG. What is your gross annual household income? - Finland

Country Banner

24	QG. What is your gross annual household income? - France
25	QG. What is your net monthly household income? - Germany
26	QG5. What is your gross yearly household income? - Great Britain
27	QG6. What is your net monthly household income? - Italy
28	QG7. What is your net monthly household income? - Netherlands
29	QG8. What is your monthly household income before taxes? - Poland
30	QG9. What is your gross yearly household income? - Portugal
31	QG10. What is your net monthly household income? - Slovakia
32	QG11. What is your gross yearly household income? - Spain
33	QG12. What is your gross yearly household income? - Sweden
34	QI. In which of the following regions do you live?

Q6. A new rule that would give retailers the right to decide which specific cards they will or will not accept even among cards carrying the same network logos (such as Visa or MasterCard). For example some credit and debit cards with the same logos may offer different levels of reward points, cash back and fraud protection, etc. Higher levels of consumer benefits usually come with a higher interchange rate for the retailer. Currently, if a retailer accepts any Visa card, they must accept all types of Visa cards. The same is true for MasterCard cards. Overall this change would make using credit, debit and pre-paid cards...
