

Ipsos Public Affairs

Ipsos Poll Conducted for Reuters

Core Political Approval

10.07.2015

These are findings from an Ipsos poll conducted

for

date

October 3-7, 2015

For the survey,

a sample of

including

ages

1,630

Americans

640

Democrats

602

Republicans

233

Independents

18+

were interviewed online

The precision of the Reuters/Ipsos online polls is measured using a credibility interval.

In this case, the poll has a credibility interval of plus or minus the following percentage points

For more information about credibility intervals, please see the appendix.

- The data were weighted to the U.S. current population data by:
 - Gender
 - Age
 - Education
 - Ethnicity
- Statistical margins of error are not applicable to online polls.
- All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error and measurement error.
- Figures marked by an asterisk (*) indicate a percentage value of greater than zero but less than one half of one per cent.
- Where figures do not sum to 100, this is due to the effects of rounding.
- *To see more information on this and other Reuters/Ipsos polls, please visit <http://polling.reuters.com/>.*

RIGHT DIRECTION/WRONG TRACK

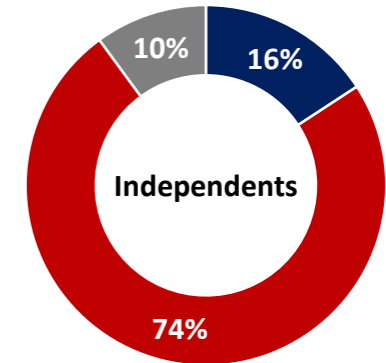

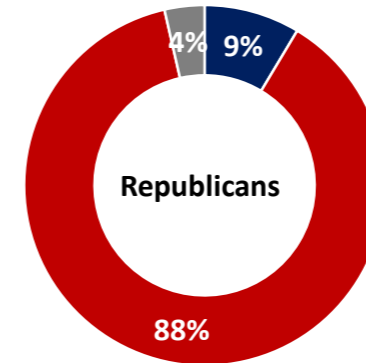

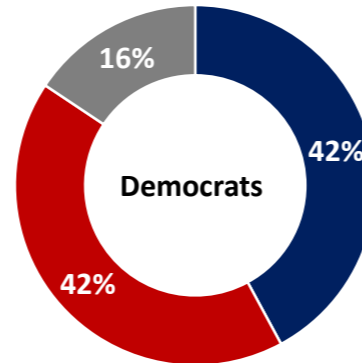

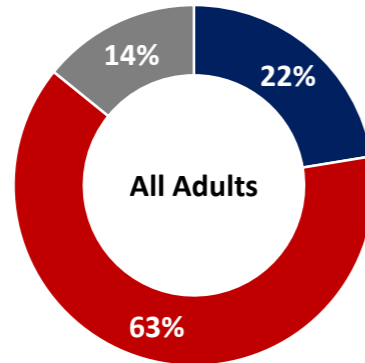

Generally speaking, would you say things in this country are heading in the right direction, or are they off on the wrong track?

October 3-7, 2015

Right Direction

Wrong Track

Don't Know

BARACK OBAMA

Overall, do you approve or disapprove about the way Barack Obama is handling his job as President?

Is that strongly (approve/disapprove) or somewhat (approve/disapprove)? (Asked of those who selected "approve" or "disapprove") Q2b. If you had to choose, do you lean more towards approve or disapprove? (Asked of those who selected "don't know") October 3-7, 2015

	Total	Democrat	Republican	Independent
Strongly approve	20%	38%	5%	12%
Somewhat approve	17%	34%	4%	16%
Lean towards approve	3%	3%	1%	3%
Lean towards disapprove	2%	2%	1%	3%
Somewhat disapprove	14%	9%	17%	21%
Strongly disapprove	36%	9%	70%	35%
Not sure	8%	4%	1%	9%
TOTAL APPROVE	40%	76%	11%	32%
TOTAL DISAPPROVE	53%	20%	88%	59%

REPUBLICAN PRESIDENTIAL PRIMARIES

Please think ahead now to the next Presidential in one year's time, in 2016.
If the 2016 Republican presidential primaries were being held today, for whom of the following would you vote?
 October 3-7, 2015

	Total (n=990)	Republican (n=602)	Independent (n=233)
Donald Trump	24%	31%	19%
Benjamin Carson	12%	17%	10%
Jeb Bush	11%	14%	9%
Carly Fiorina	5%	7%	5%
Marco Rubio	5%	7%	5%
Rand Paul	4%	4%	5%
Ted Cruz	4%	4%	1%
Mike Huckabee	3%	4%	2%
Chris Christie	3%	3%	7%
John Kasich	1%	1%	1%
George Pataki	1%	*%	2%
Jim Gilmore	*%	*%	*%
Bobby Jindal	*%	*%	*%
Rick Santorum	*%	*%	*%
Lindsey Graham	*%	*%	1%
Wouldn't vote	27%	7%	32%

TOP 3

REPUBLICAN PRESIDENTIAL CANDIDATES

Regardless of your personal preference, if the Republican Presidential Primaries came down to these candidates, for whom would you vote? October 3-7, 2015

TOP

	Total (n=354)	Republican (n=208)	Independent (n=81)
Donald Trump	30%	39%	29%
Benjamin Carson	22%	32%	19%
Jeb Bush	16%	23%	7%
Wouldn't vote	31%	5%	45%

DEMOCRATIC PRESIDENTIAL PRIMARIES

Please think ahead now to the next Presidential in one year's time, in 2016.

If the 2016 Democratic presidential primaries were being held today, for whom of the following would you vote?

October 3-7, 2015

TOP 3

	Total (n=1,028)	Democrat (n=640)	Independent (n=233)
Hillary Clinton	34%	44%	28%
Bernie Sanders	23%	27%	22%
Joe Biden	16%	18%	14%
Martin O'Malley	3%	2%	5%
Lincoln Chafee	1%	1%	1%
Wouldn't vote	24%	8%	31%

DEMOCRATIC PRESIDENTIAL CANDIDATES

Regardless of your personal preference, if the Democratic Presidential Primaries came down to these candidates, for whom would you vote? October 3-7, 2015

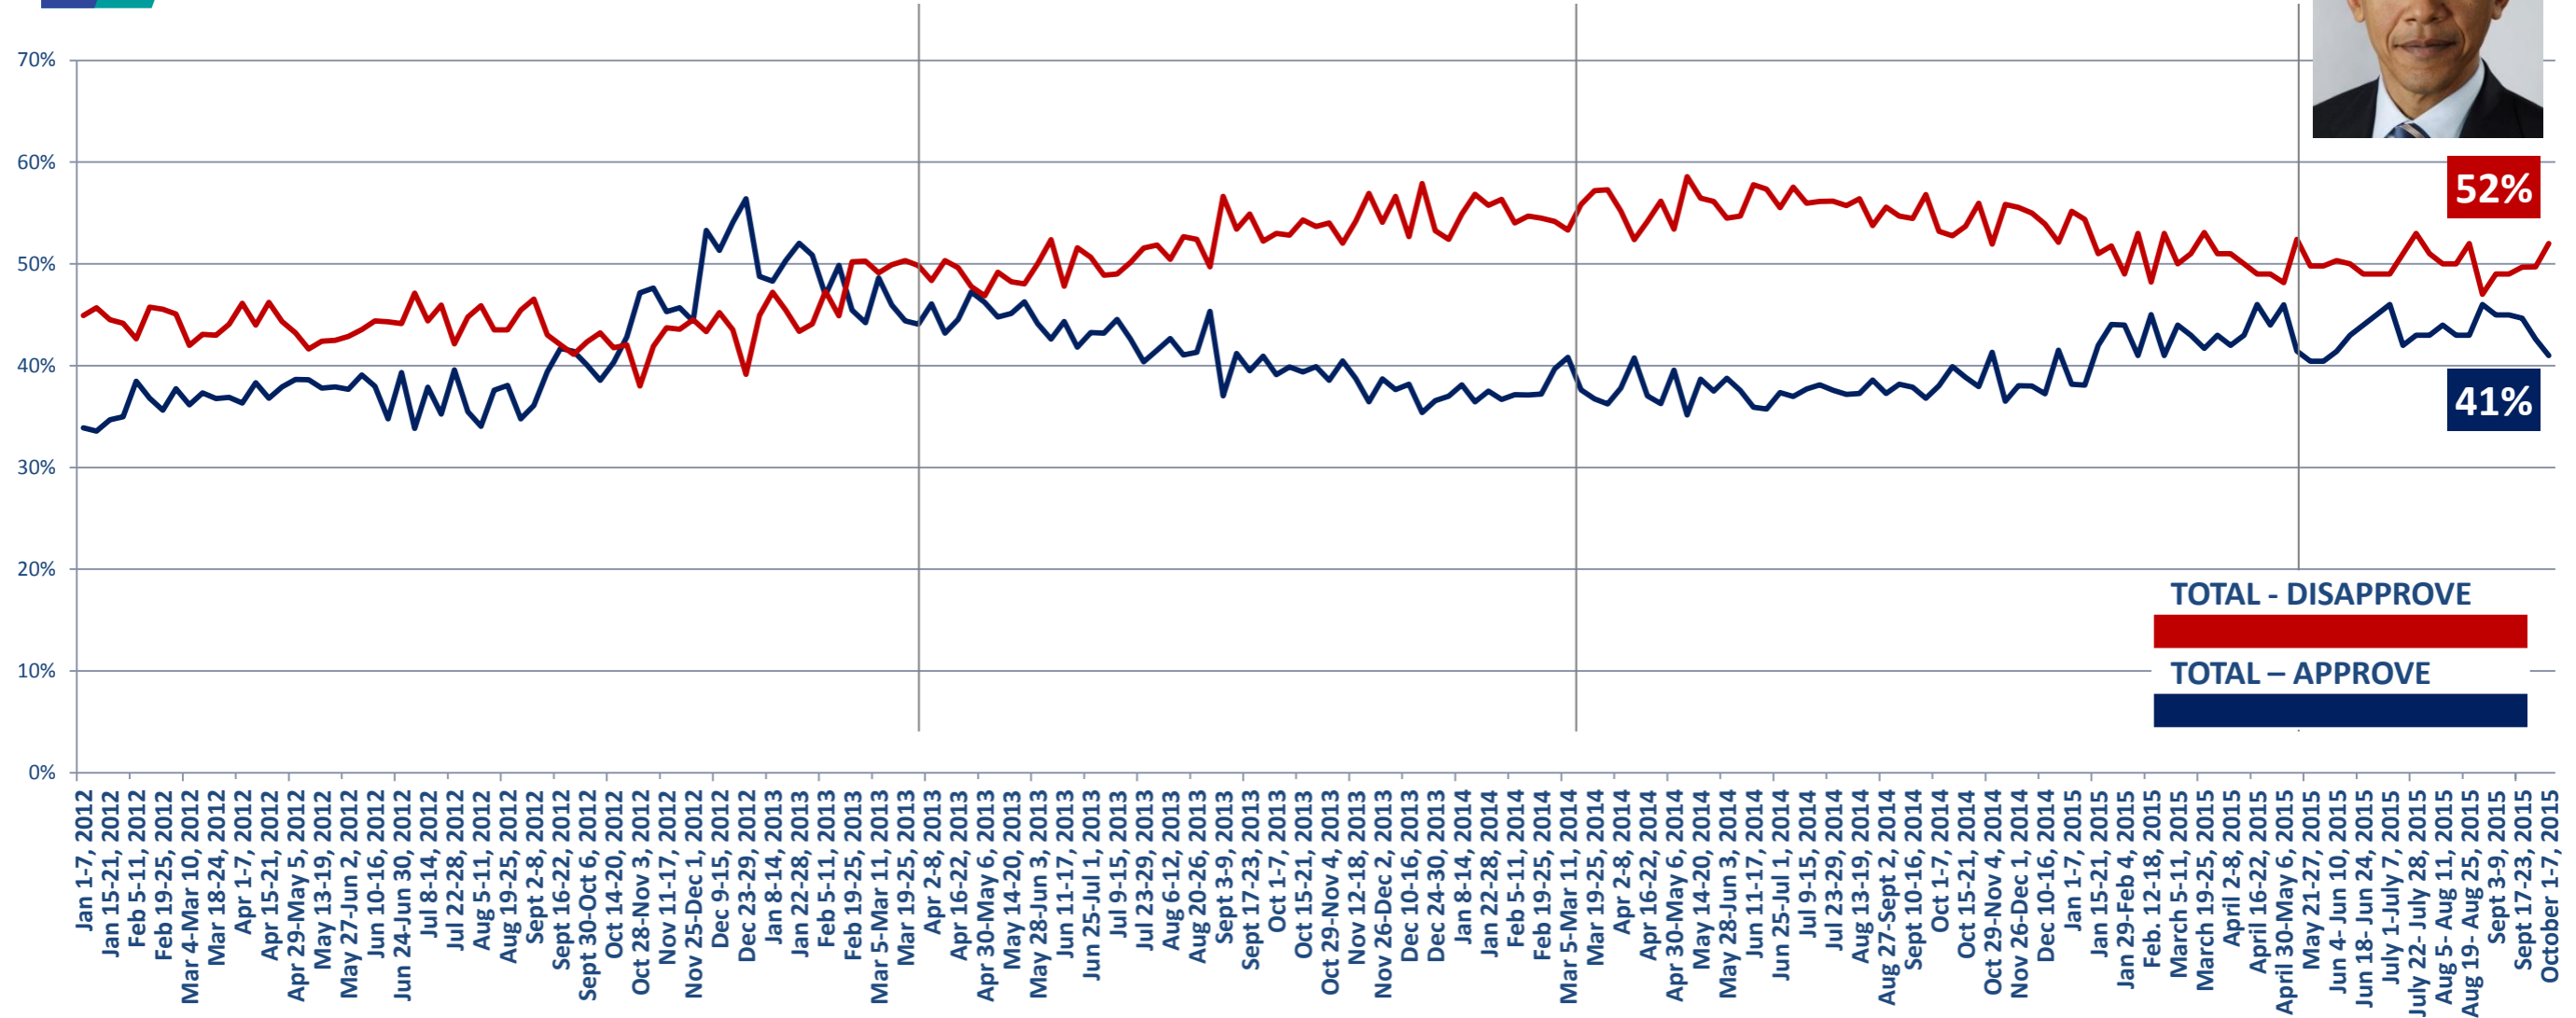

TOP

	Total (n=381)	Democrat (n=235)	Independent (n=81)
Hillary Clinton	29%	42%	19%
Bernie Sanders	21%	29%	21%
Joe Biden	20%	23%	17%
Wouldn't vote	30%	6%	43%

Weekly Presidential Approval

CORE POLITICAL APPROVAL

In your opinion, which political party has a better plan, policy or approach to each of the following?

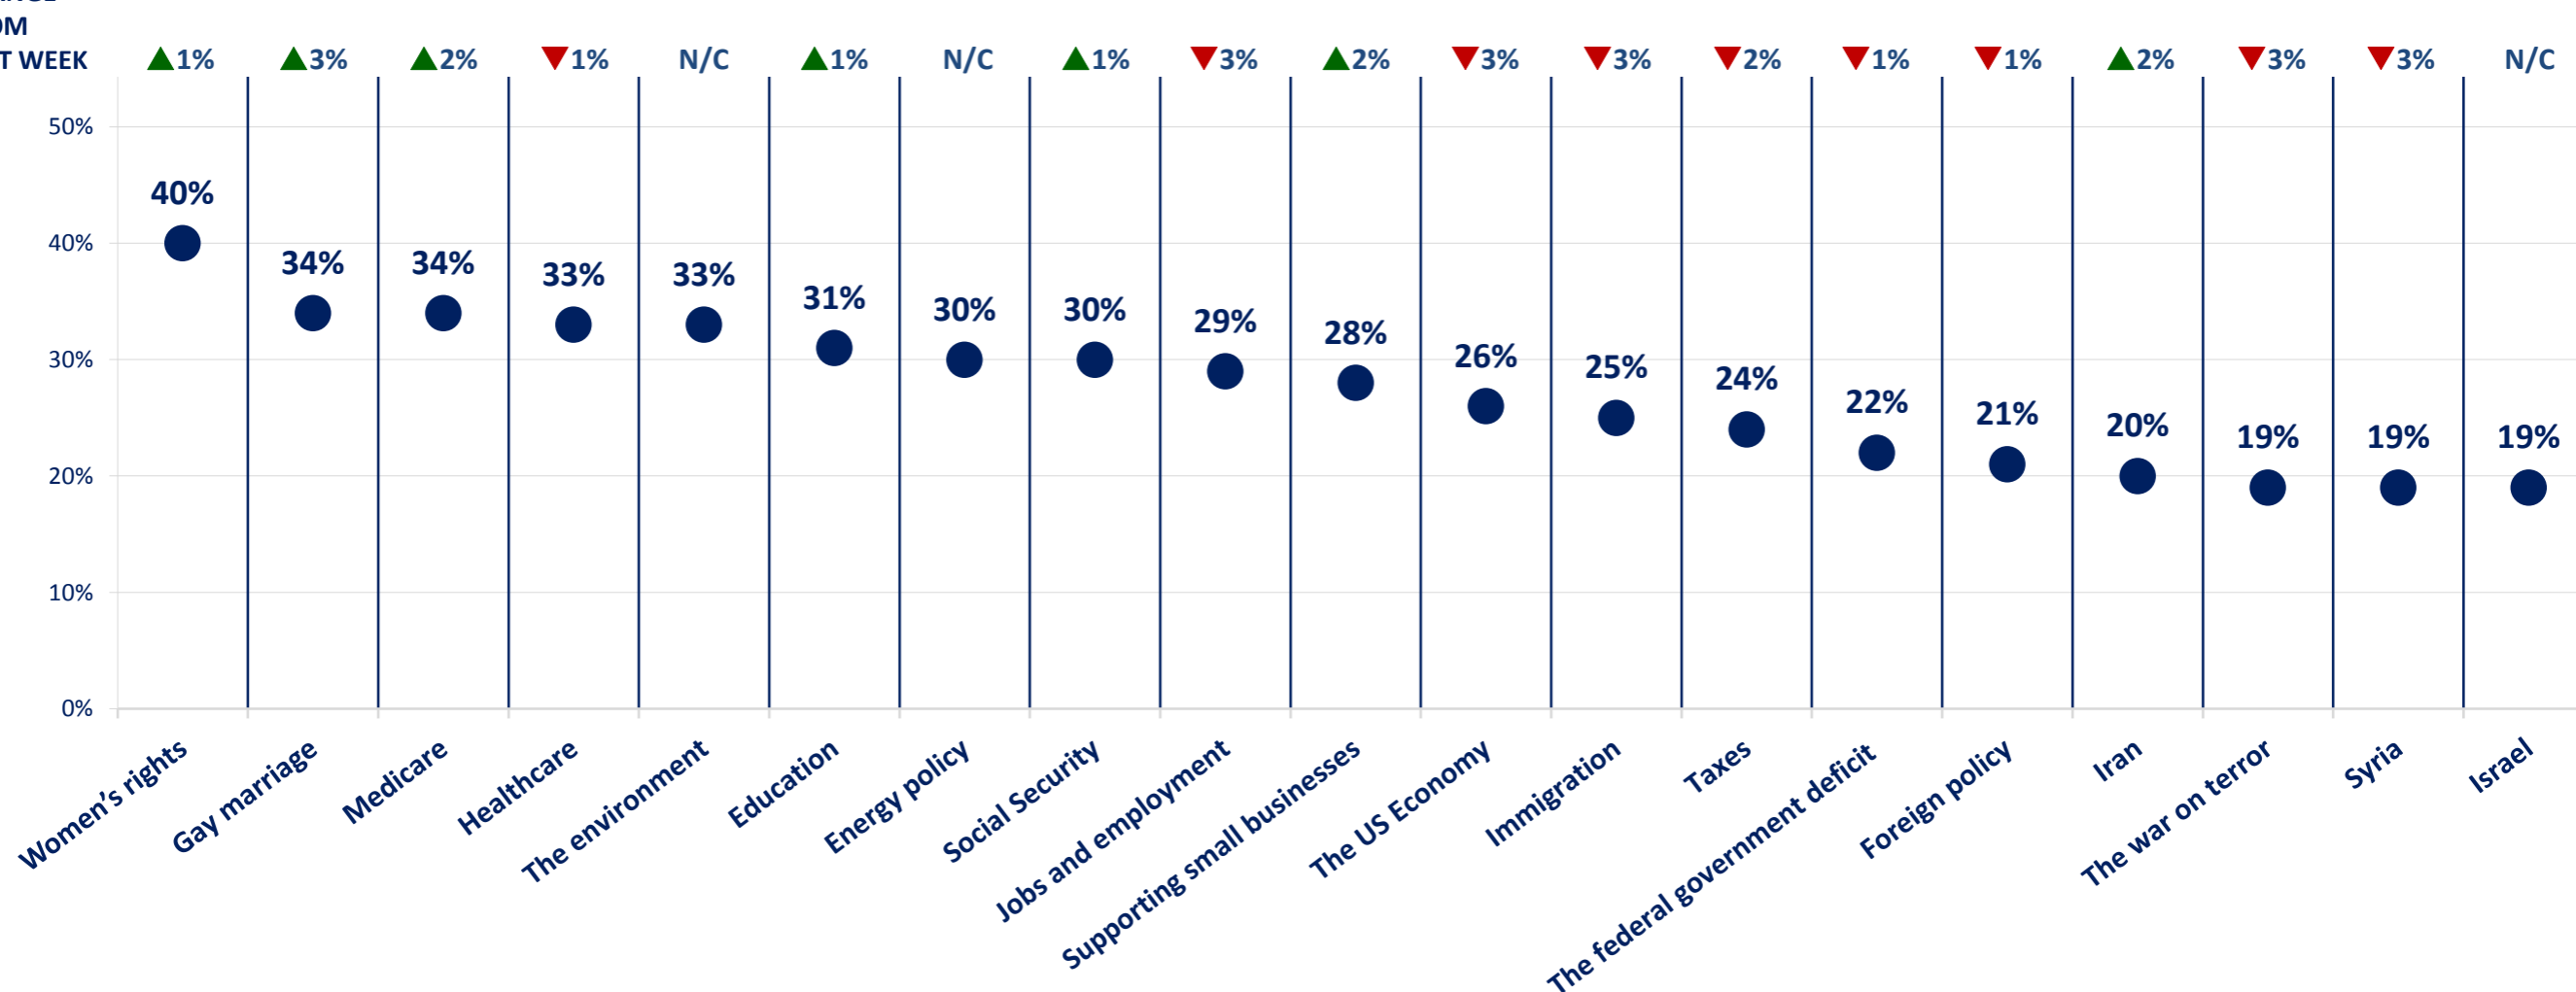

Data based on interviewing from September 28-October 7, 2015 (n=784)

All Adults (n=784)	Democratic Party	Republican Party	Independents	Other	None	Don't know	DEM/REP PARTY DIFF
Healthcare	33%	27%	6%	2%	12%	21%	7%
The war on terror	19%	31%	4%	2%	15%	28%	-12%
Iran	20%	28%	3%	3%	15%	30%	-8%
The US Economy	26%	31%	5%	2%	13%	24%	-5%
Immigration	25%	32%	6%	1%	13%	23%	-7%
Social Security	30%	25%	5%	2%	14%	24%	4%
Medicare	34%	22%	3%	2%	14%	24%	12%
Taxes	24%	31%	6%	2%	12%	26%	-7%
Gay marriage	34%	19%	5%	3%	14%	25%	15%
Jobs and employment	29%	30%	5%	2%	11%	24%	-1%

How to Calculate Bayesian Credibility Intervals

- The calculation of credibility intervals assumes that Y has a binomial distribution conditioned on the parameter θ , i.e., $Y|\theta \sim \text{Bin}(n, \theta)$, where n is the size of our sample. In this setting, Y counts the number of “yes”, or “1”, observed in the sample, so that the sample mean (\bar{y}) is a natural estimate of the true population proportion θ . This model is often called the likelihood function, and it is a standard concept in both the Bayesian and the Classical framework. The Bayesian 1 statistics combines both the prior distribution and the likelihood function to create a posterior distribution. The posterior distribution represents our opinion about which are the plausible values for θ adjusted after observing the sample data. In reality, the posterior distribution is one’s knowledge base updated using the latest survey information. For the prior and likelihood functions specified here, the posterior distribution is also a beta distribution ($\pi(\theta/y) \sim \beta(y+a, n-y+b)$), but with updated hyper-parameters.
- Our credibility interval for θ is based on this posterior distribution. As mentioned above, these intervals represent our belief about which are the most plausible values for θ given our updated knowledge base. There are different ways to calculate these intervals based on $\pi(\theta/y)$. Since we want only one measure of precision for all variables in the survey, analogous to what is done within the Classical framework, we will compute the largest possible credibility interval for any observed sample. The worst case occurs when we assume that $a=1$ and $b=1$ and $y=n/2$. Using a simple approximation of the posterior by the normal distribution, the 95% credibility interval is given by, approximately:

$$\bar{y} \pm \frac{1}{\sqrt{n}}$$

How to Calculate Bayesian Credibility Intervals

For this poll,

the Bayesian Credibility Interval was adjusted using standard weighting design effect $1+L=1.3$ to account for complex weighting²

Examples of credibility intervals for different base sizes are below.

SAMPLE SIZE	CREDIBILITY INTERVALS
2,000	2.5
1,500	2.9
1,000	3.5
750	4.1
500	5.0
350	6.0
200	7.9
100	11.2

Ipsos does not publish data
for base sizes
(sample sizes) below 100.
