Table of Contents

BC REFERENDUM	1
1. As you may know, the BC legislature recently approved the questions for the referendum on principles to guide the province's approach to treaty negotiations with Canada and First Nations. Voters will be asked to vote Yes or No to each of eight principles. I'm going to read you the preamble for the referendum, and then ask you each of the eight questions that will appear on the referendum ballot. Whereas the Government of British Columbia is committed to negotiating workable, affordable treaty settlements that will provide certainty, finality, and equality, do you agree the provincial government should adopt the following principles to guide its participation in treaty negotiations?	1
2. Overall, how informed do you currently feel about the issues addressed in these eight questions? Would you say that you are very informed, somewhat informed, not very informed or not at all informed?	4
3. And, overall, do you support or oppose the provincial government's decision to hold this referendum? (Would that be strongly/moderately support/oppose?)	5
4. Overall, do you think that holding this referendum will have a positive or negative impact on treaty negotiations with BC's aboriginal peoples over the next few years, or do you think it will have no impact at all?	6
5. As you may know, this referendum will be conducted by a mail-in ballot, which has been estimated to cost about 9 million dollars to implement. Some people say spending money on this referendum is a bad idea, because it's a waste of money, and there are other more important priorities for the government. Other people say spending money on this referendum is a good idea, because it establishes principles for treaty negotiations that will bring greater certainty to the process, and have positive long-term economic benefits for the province. Which one of these two views comes closest to how you feel about the government's proposed referendum.	7
6. Based on how you feel right now, how likely is it that you will vote in the referendum by filling in the referendum ballot and mailing it in to Elections BC for the May 15th deadline? Will you definitely vote, probably vote, probably not vote, or definitely not vote?	8
7. What is the main reason you will not vote in the referendum?	9
DEMOGRAPHICS	11
Region: Gender:	11
1. Age:	12
2. What is the highest level of formal education that you have completed?	13
4a/4b. Do you or does any member of your household currently belong to a labour union? If yes, private-sector or a public-sector union?	14
6d. What is your present employment status?	15
7. And finally, which of the following broad categories best describes your family income? That is the combined total income before taxes of all persons in your household?	16

BC REFERENDUM

BC REFERENDUM

4. Overall, do you think that holding this referendum will have a positive or negative impact on treaty negotiations with BC's aboriginal peoples over the next few years, or do you think it will have no impact at all?

BC REFERENDUM

5. As you may know, this referendum will be conducted by a mail-in ballot, which has been estimated to cost about 9 million dollars to implement. Some people say spending money on this referendum is a bad idea, because it's a waste of money, and there are other more important priorities for the government. Other people say spending money on this referendum is a good idea, because it establishes principles for treaty negotiations that will bring greater certainty to the process, and have positive long-term economic benefits for the province. Which one of these two views comes closest to how you feel about the government's proposed referendum.
