

*As you may know, the Kyoto Accord or Protocol is an agreement to reduce greenhouse gas emissions. Under this agreement, Canada has committed to reduce its greenhouse gas emissions to 6 percent below 1990 levels by the period from 2008 to 2012. The Government of Canada is currently considering ratifying the agreement, thereby making it binding on our country. Thinking of the Kyoto Protocol as it now stands, how do you think the Government of Canada should proceed? Should they...*
