

Detailed Tables

Now, the United States recently announced that they would not allow countries that did not support the United States in its war effort in Iraq, such as Canada, to bid on contracts related now to the reconstruction of Iraq. Prime Minister Martin has indicated that even though Canada did not support the war it contributed at least \$300 Million to the reconstruction process in Iraq and should be allowed to bid on the contracts. Knowing this do you think that the United States is justified or not justified in its position of refusing contracts to Canada and the other countries that did not support them in the war?

Detailed Tables

As you may know, the United States has gotten little if any help in Iraq from several longtime allies, including Canada, that opposed that war. Do you think that now, with the capture of Saddam Hussein, Canada should now give the United States a lot of help in Iraq, maintain the current level of support we are giving them, or pull out all together of any support we are currently providing the United States in Iraq and not do anything further?
