

The first question is about your overall views on the health system in your community. Regardless of whether you have used the health system recently or not we would like to know your opinions. What mark or letter grade would you give to: The overall quality of the healthcare services available to you and your family?

For each of the following statements please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree:

Base: All Respondents	TOTAL	TOTAL
Unweighted Base	1057	1057
Weighted Base	1057	1057
	Strongly/Somewhat Agree	Somewhat/ Strongly Disagree
Any discussion about making the healthcare system more sustainable also needs to guarantee timely access for essential health services	97%	2%
If governments at all levels could work closer together and share resources we would be able to afford and maintain the current health care system	91%	8%
I think that the Government of Canada can afford to put more money into the healthcare system	90%	9%
I think that a fixed portion of the Goods and Services Tax should be transferred from the federal government to the provinces to ensure long term funding of the health system	83%	16%
I think that my provincial government can afford to put more money into the healthcare system	78%	21%
I would rather have faster access to a limited list of essential health services than have slower access to a more comprehensive list of health services	71%	27%
The current Medicare system covers too much and we should cut it back to only essential services that can be delivered within current budgets	29%	69%

In the past few years the provincial and territorial premiers have been calling on the federal government to provide more money for health care. Some people say that the provinces and territories already receive sufficient federal funding and that it is simply a question of the premiers spending priorities. Others say that the federal government is not paying its fair share and should increase the funding it provides to the provinces and territories for health care. Which of these statements comes closest to your view?

Base: All Respondents	TOTAL
Unweighted Base	1057
Weighted Base	1057
Provinces and territories already receive enough federal funding	24%
The federal government is not paying its fair share	72%
Don't know/Refused	4%

Which of these two statements is closest to your opinion? The federal government should increase the amount of federal funds for health care without any conditions and let the provinces administer their health care systems as they see fit. OR The federal government should increase the amount of federal funds for health care with conditions that would see more monitoring of how the health care system works and make the health care system more accountable

Base: All Respondents	TOTAL
Unweighted Base	1057
Weighted Base	1057
No conditions and let the provinces administer	32%
Conditions to improve monitoring and accountability	67%

The next question is about the future and the sustainability of Canada's public systems such as healthcare, transportation, education and pensions. By sustainability we mean that these systems will be available to the next generation of Canadians with the same level and quality of service as they are today. Now thinking about the following items I'd like to know what mark or letter grade would you give to: 1) The sustainability of Canada's healthcare system?
