# Detailed Tables

2. Now, as you may know, there was a recent decision by The Supreme Court which indicated that provinces are not legally responsible for covering the Intensive Behavioural Treatment for children with autism. This means that while your province is not legally bound under the Canada Health Act to provide funding for this service they still can choose to do so out of their health budget. It is estimated that The Intensive Behavioural Treatment, a scientifically proven effective treatment for children with autism, which costs a family approximately \$60,000 a year would save taxpayers 1-2 million dollars over the lifetime of an autistic child. Do you think that while not obligated to cover this healthcare cost your province should do so anyways?
