*As you may know, the Canadian Federal Government has pledged 80 million dollars in aid to tsunami-hit countries, has deployed Canada's Disaster Assistance Response Team, and is introducing fast tracked immigration to Canada for sponsored family members from the affected regions. In your opinion, should the Federal Government be doing more to help those affected by the tsunami disaster, should they be doing less, or are they doing just the right amount ?*

*As stated earlier, the Federal Government has offered fast tracking immigration for those people in the tsunami-affected regions that have family sponsors here in Canada. Some people say that the government should allow only those with family sponsors a fast-tracked opportunity to come to Canada Other people say that a much larger group of people from the region should be allowed to immigrate to Canada on humanitarian grounds regardless of whether or not they have family sponsorship. Which of these two opinions is closest to your own ?*
