

## Detailed Tables

1. As you may know, Canadians are headed into an election very soon. It is likely that only Mr. Harper, the leader of the Conservative Party or the current Prime Minister, Mr. Martin, the leader of the Liberal Party will elect enough seats to form a new Federal Government. Of these two leaders, who do you trust to protect Canadian publicly funded healthcare?

## Detailed Tables

5. As you may know, currently Canada's healthcare system is a mixed public and private system with about 70% of the total health expenditure being financed by the public sector and the remaining 30% financed privately through supplementary insurance, employer-sponsored benefits or directly out-of-pocket. Do you think that more private involvement would lead to improvements in: 1) The quality of healthcare services offered in Canada?

## Detailed Tables

5. As you may know, currently Canada's healthcare system is a mixed public and private system with about 70% of the total health expenditure being financed by the public sector and the remaining 30% financed privately through supplementary insurance, employer-sponsored benefits or directly out-of-pocket. Do you think that more private involvement would lead to improvements in: 2) The availability of the healthcare services in Canada?

## Detailed Tables

6. I'm now going to read you a list of statements and I would like you to tell me whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree: 1) The best health care system would be a mix of public and private systems where the government would pay for only emergency care and essential medical services for everyone and where enhanced or quicker services were available for people who wanted to pay extra to receive those services more quickly?

## Detailed Tables

8. As you may know, there has been a lot of debate about Canada's healthcare system over the last many years to solve such issues as waiting times for surgery and other services, physician and nursing shortages, Pharmacare, and infrastructure upgrades for patient care. I'm now going to read you a list of things which could help in addressing some of these issues and prevent the creation of a second tier of healthcare. For each one I'd like you to tell me whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with each proposal: 1) Centralizing prescription drug purchasing nationally if it can be shown that it would save taxpayers' money ?

Proportions/Mean: Columns Tested (5% risk level) - A/B/C/D/E/F - G/H/I - J/K

## Detailed Tables

8. As you may know, there has been a lot of debate about Canada's healthcare system over the last many years to solve such issues as waiting times for surgery and other services, physician and nursing shortages, Pharmacare, and infrastructure upgrades for patient care. I'm now going to read you a list of things which could help in addressing some of these issues and prevent the creation of a second tier of healthcare. For each one I'd like you to tell me whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with each proposal: 2) Developing a Canada-wide government financed Pharmacare program that would provide to Canadians most doctor-prescribed drugs without charge ?

As you may know, there has been a lot of debate about Canada's healthcare system over the last many years to solve such issues as waiting times for surgery and other services, physician and nursing shortages, Pharmacare, and infrastructure upgrades for patient care. I'm now going to read you a list of things which could help in addressing some of these issues and prevent the creation of a second tier of healthcare. For each one I'd like you to tell me whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with each proposal: 6) Extend coverage of publicly insured services to include access to home care, long-term care, mental health care and drug benefits ?

Proportions/Mean: Columns Tested (5% risk level) - A/B/C/D/E/F - G/H/I - J/K
