If you heard that the Canadian Medical Association, that is the national association that represents Canadian physicians, had released a document which outlines their ten principles for managing the interaction between the public health care sector and the private health care sector in Canada, would you think this was a very positive development, somewhat positive, somewhat negative or very negative development for the future of Canada's health care system?

You may have seen in the paper recently stories about proposals that various provinces are putting forward that might alter the roles of the public and private sectors in the funding and delivery of health care. I am going to read you two statements and I would like you to tell me, which is closest to your own view?
