

As you may know, an outbreak of Swine flu has occurred in Mexico and spread to other countries. The flu, also known as H1N1, is normally contracted through contact with pigs, however, it appears that this strain is spread through human-to-human contact. There is currently no remedy for the flu but medical professionals are investigating options. Based on what you've seen, read or heard, how concerned are you that you or someone else in your family may contract this flu over the next number of weeks or months?
