5. For every 1,000 children in Canada, 6 die before they reach the age of 5. In many of the world's poorest countries, the under-5 mortality rate is higher. How many times higher do you think the under-5 mortality rate is in these countries versus Canada, based on an average of the 30 countries with the highest child-mortality rates?

6. The primary causes of deaths of children under 5 in Canada are accidents, birth defects, cancer, heart problems and the flu. But globally, the five most-common causes of under-5 child deaths are birth complications, diarrhea, malaria, measles and AIDS. One in every three of those deaths is attributed to malnutrition. Why do you think these reasons differ so greatly?

Since children in poor countries are much more susceptible than Canadian children to contract preventable diseases, we should be placing just as much...	426 21%	251 26% B	175 17%	117 21%	188 23% E	121 18%	57 27% G	151 19%	146 22%	72 20%
I think it's great that a lot of focus is placed on immunizing Canadian children against the H1N1 flu and other diseases.	331 16%	162 16%	169 16%	128 23% DE	133 17% E	70 11%	33 15%	113 14%	123 19% G	63 17%
I want Canada to be known as a global leader in finding solutions to poverty and protecting the world's children.	310 15%	185 19% B	125 12%	74 13%	138 17%	97 15%	35 17%	132 17%	96 15%	47 13%
Despite the economic downturn, because Canada and other G8 countries made promises to reduce the number of child deaths by two thirds in poor countries...	267 13%	162 17% B	105 10%	67 12%	117 14%	83 13%	38 18% I	103 13%	89 13%	37 10%
Canada should use its influence in hosting the G8 and G20 to make sure that promises made to reduce childhood deaths are kept.	245 12%	145 15% B	100 10%	61 11%	115 14% E	69 10%	34 16% I	92 12%	87 13% I	31 9%
