1. With the Olympics coming to Vancouver and then the G8 meetings in Muskoka next year, all eyes will be on Canada, and the government will have an opportunity to raise awareness on some key issues affecting the world. Which two of the following do you believe the government of Canada should emphasize the most on the global stage?

Proportions/Means: Columns Tested (5% risk level) - A/B/C/D/E/F - G/H/I - J/K Overlap formulae used.

5. For every 1,000 children in Canada, 6 die before they reach the age of 5. In many of the world's poorest countries, the under-5 mortality rate is higher. How many times higher do you think the under-5 mortality rate is in these countries versus Canada, based on an average of the 30 countries with the highest child-mortality rates?

Proportions/Means: Columns Tested (5% risk level) - A/B/C/D/E/F - G/H/I - J/K Overlap formulae used.

6. The primary causes of deaths of children under 5 in Canada are accidents, birth defects, cancer, heart problems and the flu. But globally, the five most-common causes of under-5 child deaths are birth complications, diarrhea, malaria, measles and AIDS. One in every three of those deaths is attributed to malnutrition. Why do you think these reasons differ so greatly?
