

1. As you may know, Omar Khadr is a Canadian citizen who was captured by U.S. troops after a firefight in Afghanistan and held in Guantanamo Bay for the last seven years. After maintaining his innocence since being captured, he has recently pleaded guilty to being a member of al-Qaeda, participated in acts of terrorism and murdered an American soldier as part of a plea bargain negotiated by both Canada and the United States that could allow him to serve some of his sentence in Canada. Some people say that Omar Khadr probably is not guilty and was forced into this plea bargain as his only option to be released someday after serving his sentence, and that the Canadian government should have been offering him more assistance prior to this point. Other people say that Omar Khadr probably is guilty and this plea bargain is too generous, and that the Canadian government was right not to have offered him any assistance up to this point Which is closer to your point of view?

2. After serving one year of his sentence in the United States, as part of his plea bargain as a Canadian citizen, Omar Khadr could be eligible to serve the remainder of his sentence in Canada, where prison conditions are better and the minimum amount of time served prior to being eligible for parole is much lower than in the United States. Do you think that Khadr should serve all, some or none of his sentence in Canada:
