

S1_1. [Pass a law requiring TV cable companies to allow consumers to pick the specific pay TV channels they want as opposed to making them buy bundles that include channels they don't want.]
As you may know, this week the Harper government presented what's called a Throne Speech that spells out its priorities for the next number of months before the election scheduled for 2015. Based on what you've seen, read and heard do you think the priorities given in the Throne Speech are on the right track or headed in the wrong direction for Canada? For each of the following, I'd like to know if the Harper Conservatives did this, would it make you more likely, less likely, or no more or less likely to vote for them in the next federal election?
