1. In developing countries, 18,000 children die every day from preventable causes such as birth complications, diarrhea, malaria, measles and AIDS. Which of the following do you feel describe why these children continue to die from preventable causes?

3. Although global child and maternal death rates are dropping, there has been less progress in some countries than others. Conflict and instability make it challenging to reach people in remote communities and deliver assistance. For example, in Somalia the mortality rate of children under 5 years is about 18%, while in neighbouring Tanzania it has dropped to 8 percent. With this in mind, do you think that funds allocated to child, newborn and maternal health initiatives should be spent:

5_1. [Every child, no matter where he or she is born, should be registered at birth and receive a birth certificate]

Globally, one third of all children under the age of five have not been registered at birth and have no birth certificate or proof of identity. As such, their governments are unaware that they exist. These uncounted, unreached children are often the most vulnerable and hardest to reach. To what extent do you agree with the following statements:

5. [SUMMARY - LOW2BOX (DISAGREE)]

Globally, one third of all children under the age of five have not been registered at birth and have no birth certificate or proof of identity. As such, their governments are unaware that they exist. These uncounted, unreached children are often the most vulnerable and hardest to reach. To what extent do you agree with the following statements:

	Total	Gender		AGE			EDUCATION			
		Male	Female	18-34	35-54	55+	<HS	HS	Post Sec	Univ Grad
		A	B	C	D	E	F	G	H	I
