3. Although global child and maternal death rates are dropping, there has been less progress in some countries than others. Conflict and instability make it challenging to reach people in remote communities and deliver assistance. For example, in Somalia the mortality rate of children under 5 years is about 18%, while in neighbouring Tanzania it has dropped to 8 percent. With this in mind, do you think that funds allocated to child, newborn and maternal health initiatives should be spent:

		REGION						HOUSEHOLD INCOME				HOUSEHOLD

5_5. [Making sure every child is known to its country's government is an important step to improving the lives of children]

Globally, one third of all children under the age of five have not been registered at birth and have no birth certificate or proof of identity. As such, their governments are unaware that they exist. These uncoun­ted, unreached children are often the most vulnerable and hardest to reach. To what extent do you agree with the following statements:

		REGION						HOUSEHOLD INCOME				HOUSEHOLD
